

Social science helps us

## Do science in the dark

- Where models are misleading, what else can we rely on?
- What are the limits of formal statistics and how might we then proceed?

CATS has facilitated fruitful discussions between different statistical and scientific communities, highlighting areas of disagreement and areas which need further work.

Berger, J.O. and Smith, L.A (2019) 'On the statistical formalism of uncertainty quantification,' *Annual Review of Statistics and its Application*, 6. 3.1-3.28. ISSN 2326-8298.
