

We can help to

Re-use waste heat

- How can we use waste heat from urban infrastructure such as metro systems?
- How can we help attract investment and build a business case?

Waste heat has the potential to supply 10 percent of Europe's heat demand. We are working with a wide range of stakeholders to help unlock this potential.

ReUseHeat is an EU Horizon 2020 project 767429.

Lygnerud, K., Wheatcroft, E. and Wynn, H., 2019. Contracts, business models and barriers to investing in low temperature district heating projects. *Applied Sciences*, 9(15), p.3142.
