

	A	B	C	D	E	F	G	H
Assets	20%	20%	20%	15%	15%	5%	10%	25%
Leverage	20x	20x	5x	6⅔ x	6⅔ x	20x	10x	4 x

In going from Perfect to Imperfect Model:

60% prob(X) unchanged
20% prob(X) increased
20% prob(X) decreased.

Where $\text{prob}(X) := \text{bet on the verification.}$

Considering all the bets:

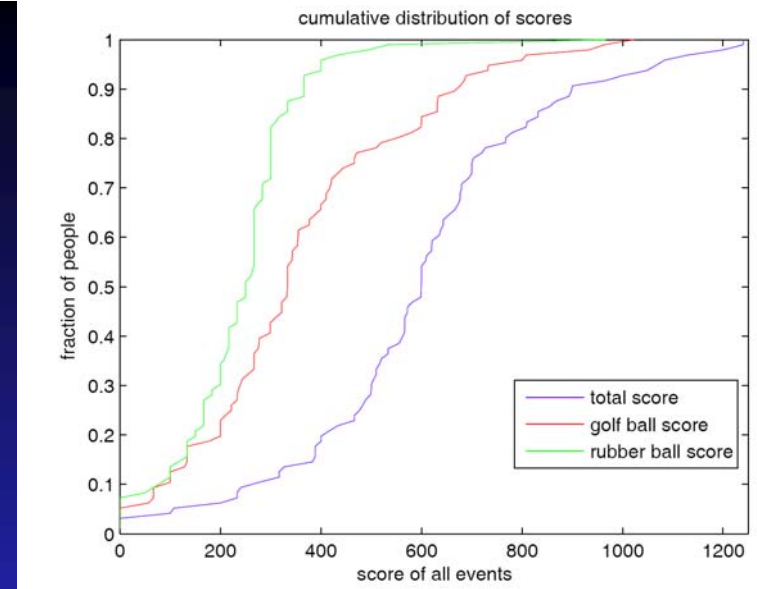

For each individual pin: ~60 % of you changed a bet , 40% kept the same
But counting all pins: ~30% people held all bets constant!

Circling the Right Target:

You did systematically better on the Red Reality ball than on the Golf ball.

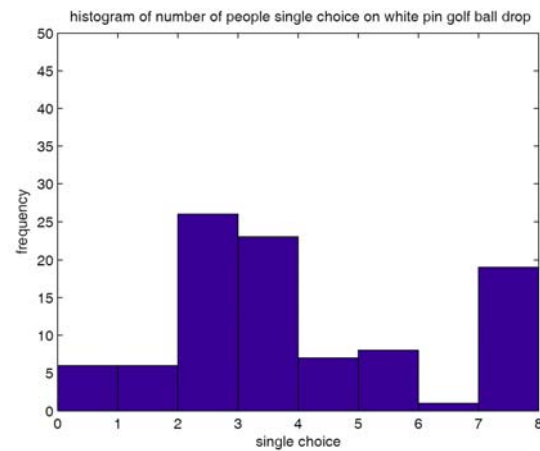

Number Correct	Golf-ball	Red-Ball
0	76	43
1	17	38
2	2	10
3	1	5

So the betting strategy mattered!
