The Finances of the East India Company in India, c. 1766-1859

John F. Richards

Foreword

The following pages contain a list of tables that John F. Richards (1938-2007) had compiled in preparation for a major work on the fiscal history of India during the transition from Mughal to British rule in the region. The longer work that these tables were expected to feed into could not be completed in his lifetime, but Richards did complete a shorter text on the subject, which is being published as a chapter in Bartolome Yun Casalilla and Patrick O'Brien, eds., *The Rise of Fiscal States in Eurasia. A Global History* (Cambridge, forthcoming). The chapter is accompanied by a set of charts and graphs. Much of the original datasets that these charts are based on can be found in this paper.

Richards, a long-time member of the history faculty of Duke University, Durham, USA, was a leading scholar of Mughal India. His research interest encompassed the political and economic history of early modern India seen in the context of a changing world economy, and diversified towards environmental history in the 1990s, again with a significant Indian component in it. A select list of publications should include *Mughal Administration in Golconda* (Oxford, 1975); *The Mughal Empire* (Cambridge, 1993); *The Unending Frontier: An Environmental History of the Early Modern World* (Berkeley and Los Angeles, 2003); 'Early Modern India and World History' (*Journal of World History*, 1997); 'The Seventeenth Century Crisis in South Asia' (*Modern Asian Studies*, 1990); 'Mughal State Finance and the Premodern World Economy' (*Modern Asian Studies*, 1981); and 'The Indian Empire and Peasant

Production of Opium in the Nineteenth Century' (*Modern Asian Studies*, 1981).

As this short list of titles shows, the problem of the imperial state interested Richards particularly. Unlike many of his contemporaries, he saw the problem of empire less in terms of political and military alliances and more in terms of a solution to a universal fiscal challenge, attaining a stable and large flow of revenue to the centre by means of expenditure patterns that supplied enough incentives to regional constituents to remain loyal. This was a difficult balancing act, and the rise and fall of empires depended on how the balance was achieved. Richards in his last major and unfinished work addressed the problem by comparing the fiscal history of two imperial state systems in the eighteenth century world, both located in South Asia.

To that end, he processed a vast quantity of statistical data on the state finances of the Mughal Empire and the East India Company. A subset of this dataset, on East India Company finances c.1780-1859, cannot be found in such finished form anywhere else. These tables were culled out from Parliamentary Papers. The fact that the original data were processed by Richards gives the tables a trademark of reliability. The dataset has value not only in the context of Richards' own work. It has also much value as a reference resource for historians of early modern India, discourses on fiscal states, and the comparative economic history of the eighteenth century world. I am grateful to Professor Bartolome Yun Casalilla, European University Institute/Universidad Pablo de Olavide (Seville, Spain), Professor Patrick O'Brien, and Dr. Bethany Aram Worzella, Universidad Pablo de Olavide, for making available these tables for publication in a Working Paper of the department.

Tirthankar Roy
