Global Health Innovation

# LSE-ICL Forum on Medical Innovation

## Assessing Value and Sustainable Financing of Innovative Therapies

**Date:** 14 October 2015, 1.30 — 6.00pm

**Hosted by:** London School of Economics and Political Science  
in partnership with Imperial College London

**Location:** South Kensington Campus, Imperial College London

*The number of innovative medical technologies addressing high unmet medical need and offering significant improvements in survival and patient quality of life has increased in recent years. In some cases, innovative therapies introduced are offering a cure rather than long-term maintenance. The high cost and potential budget impact of these technologies has raised concern amongst decision-makers. This event is a unique opportunity to bring together clinical expertise, technical innovation and scientific thinking to discuss the latest developments in medical innovation, recent challenges and future prospects.*

The Forum is supported by Gilead Sciences, Inc. which has provided funding through an unrestricted educational sponsorship.

**Opening  
Remarks**  
14:00 -14:10
