Welcome by the Head of Department

Welcome to the MSc Statistics, MSc Statistics (Financial Statistics) and MSc Statistics (Social Statistics) Programmes at the LSE.

Statistics is an application-oriented mathematical science concerned with the collection, analysis, interpretation and presentation of data. It provides us with the necessary tools to reduce uncertainty in modern society. It is a powerful tool for testing hypotheses about social and natural phenomena, analyzing relationships among variables, studying trends, planning and decision making. Statistics is applicable to a wide variety of disciplines, including natural sciences, social sciences, economics, finance and insurance.

Graduates from our MSc programmes typically find employment in business, government agencies and in the insurance and financial sectors. A number of our graduates continue with us beyond Masters Level to gain a PhD.

This year, we are also delighted to receive our first cohort of students onto our MSc Statistics (Social Statistics). This newly introduced stream of the programme aims to provide high-level training in the theory and application of modern statistical methods, with a focus on methods commonly used in the social sciences.

The Department of Statistics at LSE has an international reputation and has been the academic home for a host of distinguished statisticians. Currently the Department has three research groups: Probability in Finance and Insurance, Social Statistics and Time Series & Statistical Learning.

LSE is one of the finest institutions of its kind in the world and has a key position, geographically in terms of its location in central London and geo-politically in term of its national and international standing. Our success very much depends on your success and we look forward to getting to know you and supporting you in your endeavours. I would like to wish you all the best for your studies here and I hope that you will make the most of your time with us.

Professor Pauline Barrieu, Head of the Department of Statistics
The Department of Statistics

The Department of Statistics at the LSE is a growing, friendly department with an excellent reputation in many areas of statistics. It enjoys a unique position, comprising a body of professional statisticians in an economics and social science institution. The advantages of this position can be seen in the major contributions the Department has made in theoretical statistics and its applications in actuarial science, social statistics and econometrics.

The Department offers academic programmes at all levels: BSc, MSc and MPhil/PhD. It also shares teaching and research with other sections of the School that have strong interests in statistics, including the Department of Mathematics, the Department of Finance, the Department of Methodology, and the Department of Economics. The Department is home to the LSE Centre for the Analysis of Time Series (CATS) and also has close links with The Royal Statistical Society and the Institute of Actuaries.

Staff in the Department are located on the 5th, 6th, 7th and 8th floors of Columbia House (COL) and the entrance is on Aldwych. The administrative (Professional Services Staff) offices are located on the 6th floor, COL 6.11, COL 6.12 and COL 6.13.
Term dates

Michaelmas Term (MT)

Thursday 21 September – Friday 8 December (teaching begins on Monday 25th September 2017)

For departments with courses that will be examined in January, examinations will be held in week 0 (Tuesday 2 January – Friday 5 January). More information can be found here: http://www.lse.ac.uk/resources/calendar/CourseAndProgrammeInfo/LentTermWeek0Exams.htm

Lent Term (LT)

Monday 8 January – Friday 23 March

Summer Term (ST)

Monday 23 April – Friday 8 June

For those courses that operate them, School Reading Weeks are the weeks beginning Monday 30 October 2017 and Monday 12 February 2018

The School will also be closed for English public holidays*. In 2017/18 these will be:

- Christmas Closure Thursday 21 December 2017 – Monday 1 January 2018
- Easter Closure Thursday 29 March – Wednesday 4 April 2018
- May Bank Holiday Monday 7 May 2018
- Spring Bank Holiday Monday 28 May 2018
- Summer Bank Holiday Monday 27 August 2018

*Some facilities, such as the Library, may open on some of these dates. The School will issue updates throughout the year.
### All Academic Staff

Communication from the School and the Department

Programme Directors

The MSc Statistics, MSc Statistics (Financial Statistics) and MSc Statistics (Social Statistics) Programme Directors are also academic advisers to all students on the respective programmes. During Week 1 of MT, the Programme Directors will arrange individual meetings to discuss course options.

In the academic session 2017/18, the Programme Directors are:

Dr Jouni Kuha (MSc Statistics and MSc Social Statistics), COL 8.02 j.kuha@lse.ac.uk
Dr Clifford Lam (MSc Financial Statistics), COL 6.09, c.lam2@lse.ac.uk

LSE for You

LSE for You is a personalised web portal which gives you access to a range of services. For example, you can:

- view or change your personal details
- reset your Library and network passwords
- monitor and pay your tuition fees online
- check your exam results

You can also access online tutorials on how to navigate and personalise LSE for You via its login page. Use your LSE network username and password to login via lse.ac.uk/lseforyou.

Contacting you by phone/post

Sometimes it will be necessary for us to post information to you, or for urgent matters, to contact you by telephone. It is important that the School has your correct contact details. If your contact details change please amend your details via LSE for You.

Face-to-face contact

All academic staff hold Advice and Feedback Hours, which are designated for meeting with students. Matters related to an individual course should normally be discussed with the teacher in charge; and therefore the Advice and Feedback hours are an important supplement to the teaching.

Matters of a more general nature – for example academic, teaching and learning, prospective careers - can of course be discussed with any teacher serving on the programme. This also goes for personal matters affecting individual progress of studies, but in such cases, please remember that you can always get in touch with your Programme Director (since the Programme Director may need to be kept informed of these matters anyway). If you aren’t able to attend their Advice and Feedback Hours, you can always email or call them to arrange an appointment outside of these hours. Please don’t feel awkward about doing so, as they are there to help you.

Bear in mind that Advice and Feedback Hours are subject to change, so please ensure that you check our website, where these are kept updated.
E-mail

The School and the Department of Statistics will use your LSE email address to communicate with you so you should check it regularly (at least once a day during term time between 9am-5pm). Information on course arrangements, meeting, seminars and also job advertisements, are distributed by e-mail and via Moodle.

The email program Microsoft Outlook is available on all student PCs on the LSE network. You can also access e-mail off-campus using webmail and remote desktop or on the move, using email for laptops and mobile phones. For instructions on how to access your e-mail off campus, visit http://www2.lse.ac.uk/intranet/LSEServices/IMT/remote

MSc Administrator Newsletter

The MSc Administrator also sends a fortnightly email update during term time. This contains crucial information about your studies, such as coursework submission and other important deadlines; as well as updates on events happening in the Department, job vacancies and learning and development opportunities.

Facebook

Many of you will already be familiar with the Offer-holders Facebook group. The group will continue throughout your time at LSE and the MSc Administrator will continue to post information about careers and social events amongst other things.

If you have not yet joined the group, you can request to do so here: https://www.facebook.com/groups/1415911115096740/

Please note that Facebook is not a substitute for email; and you should always check your email first and foremost for any important information.

Twitter

Follow us on Twitter @StatsDeptLSE for information about seminars and events both in the Department and the School, as well as a wealth of other useful information! Our Twitter feed also links to our Facebook page, so you don’t even have to be on Twitter to see all our Tweets. https://twitter.com/statsDeptLSE

Moodle

Moodle is LSE’s Virtual Learning Environment (VLE). It is a password protected web environment that contains a range of teaching resources, activities, assignments, information and discussions for your course. The content of Moodle is the responsibility of your teacher and so it will vary from course to course; not all teachers choose to use Moodle.

You can access Moodle from any computer connected to the internet, on and off campus. Go to http://moodle.lse.ac.uk/ and use your LSE user name and password to log in. This page also has links to help and advice on using Moodle.
You will also find links to Moodle from a number of web pages, including the webpage for 'Staff & Students'. If you have any technical problems with Moodle you should contact the helpdesk at it.helpdesk@lse.ac.uk.

**Student Staff Liaison Committee (SSLC)**

At the start of the year the Department will ask for volunteers to represent your programme on the Staff Student Liaison Committee. These are important Committees as they provide a forum for feedback from students on their programme and for discussion of issues which affect the student community as a whole. The role of an SSLC representative is therefore central to ensuring that courses and programmes in the School work efficiently; and those elected or chosen as a representative will be given training.

SSLC meetings are held once a term in Michaelmas and Lent Terms, with refreshments provided.

The SSLC also elects one representative to attend the relevant School level Students' Consultative Forum. More information on the Consultative Fora can be found here: [http://www.lse.ac.uk/studentRepresentation/home.aspx](http://www.lse.ac.uk/studentRepresentation/home.aspx)

**Department of Statistics Online Feedback Form**

If you have any ideas, concerns, or comments for the Department of Statistics, you can post this anonymously via the Online Feedback Form which is managed by the Students Union. Feedback, as well as our responses will be published on the Department of Statistics website. All the information will be anonymised and will not be attributable to any individual.
Events

Seminars

All MSc students are encouraged to attend the seminars that are organised by the Department. Details regarding events are sent out via regular emails and are also announced on Twitter; therefore all students are advised to follow the Department of Statistics on Twitter @StatsDeptLSE

The Joint Probability in Finance and Insurance and Financial Mathematics Seminar Series run regularly during term time. These seminars aim to promote communication and discussion of research in the mathematics of insurance and finance and their interface, to encourage interaction between practice and theory in these areas, and to support students academically in related programmes at postgraduate level.

Students can also attend the London Mathematical Finance Seminar Series. Further details will be published soon and can be found here:
http://www.londonmathfinance.org.uk/

Probability in Finance and Insurance Annual Conference

The two-day Probability in Finance and Insurance Conference (formerly known as the Risk and Stochastics Conference) is an annual two-day event, normally held in the Lent term. High profile speakers from the UK and overseas present recent advances in the areas of risk and stochastics and financial mathematics and there is plenty of opportunity to network. Dates for the 2017/18 conference will be announced in due course and students will be notified as soon as this happens. The event is free to all students.
http://www.lse.ac.uk/statistics/events/events.aspx
Programme Structure

Taught postgraduate courses are based around lectures, with problem classes and computer workshops. Most courses are assessed by a two-hour exam in the summer term although some contain an element of course work.

The courses in the programme are divided up into two categories: the compulsory course and options. Students must take courses to the value of four full units.

The majority of the courses on the MSc Statistics, MSc Financial Statistics and MSc Social Statistics are assessed in the Summer term; however please note that for a small number of courses, including ST425, the exam will take place in Lent Term Week 0 (week beginning 2nd January).

More detailed information on each course can be found in the course guides on the School’s web site at: http://www.lse.ac.uk/resources/calendar/courseGuides/graduate.htm

Course structure - MSc Statistics (9-month)

You must take courses to the value of four units. The compulsory course makes up one unit. The remaining three units are made up by options.

Compulsory course:

- ST425 Statistical Inference: Principles, Methods and Computation (F) (Lent Term Week 0 exam)

Optional Courses:

Choose to the value of three full units from:

- ST405 Multivariate Methods (H)
- ST409 Stochastic Processes (H)
- ST411 Generalised Linear Modelling and Survival Analysis (H)
- ST416 Multilevel Modelling (H)
- ST418 Nonlinear Dynamics and the Analysis of Real Time Series (H)
- ST421 Developments in Statistical Methods (H)
- ST422 Time Series
- ST426 Applied Stochastic Processes (H)
- ST435 Advanced Probability Theory (H) (Lent Term Week 0 Exam)
- ST443 Machine Learning and Data Mining (H)
- ST444 Statistical Computing (H)
- EC484 Econometric Analysis (F) (Department of Economics) (Lent Term Week 0 Exam) *
- MA407 Algorithms and Computation (H) (Department of Mathematics)
- MY456 Survey Methodology (H) (Department of Methodology)
- MY457 Causal Inference for Observational and Experimental Studies (H) (Department of Methodology)
- SA481 Basic Population Analysis (H) (Department of Social Policy)
*Statistics students taking EC484 are required to register in early September in order to attend the econometrics component of the pre-sessional courses EC451. Students must pass an exam taken at the end of the pre-sessional in order to proceed to EC484.

- \( H = \text{Half Unit; } F = \text{Full Unit.} \)

Please note:

- Other courses may be taken with permission, except for: ST433, ST436, ST439, ST440, MA415, MA416, MA420 and any courses indexed FM.

- The total value of non-ST courses (including any selected from the list of optional courses) cannot exceed one full unit and any unlisted courses may be taken with the permission of the Programme Director and the course lecturer.

Course structure - MSc Statistics (Research)

The 12-month research branch is similar to the MSc Statistics 9-month programme but involves a compulsory dissertation (ST499). You must take courses to the value of four units. The compulsory courses make up two units. The remaining two units are made up by options.

Dissertation topics are chosen in November; usually from a list provided by academic staff. Students then work on their project for the rest of the year, under the guidance of their supervisor, with a submission deadline in late August.

Compulsory courses:

- ST425 Statistical Inference: Principles, Methods and Computation (Lent Term Week 0 Exam)
- ST499 Dissertation

Plus optional courses to the value of two full units, as listed above for the MSc Statistics. In addition, students may also choose the following:

- MY400 Fundamentals of Social Science Research Design (H) (Department of Methodology)
Course structure - MSc Statistics (Financial Statistics) (9-month)

You must take courses to the value of four units. The compulsory courses make up two units. The remaining two units are made up by options.

Compulsory Courses:

Three compulsory courses (two full units):

- ST422 Time Series (H)
- ST425 Statistical Inference: Principles, Methods and Computation (F) *(Lent Term Week 0 Exam)*
- ST436 Financial Statistics (H)

Optional Courses:

Courses to the value of two units from the following (with the proviso that the value of non-statistics and non-methodology courses cannot exceed one full unit):

- ST405 Multivariate Methods (H)
- ST409 Stochastic Processes (H)
- ST411 Generalised Linear Modelling and Survival Analysis (H)
- ST416 Multilevel Modelling (H)
- ST418 Nonlinear Dynamics and the Analysis of Real Time Series (H)
- ST421 Developments in Statistical Methods (H)
- ST426 Applied Stochastic Processes (H)
- ST429 Statistical Methods for Risk Management (H)
- ST433 Computational Methods in Finance and Insurance (H)
- ST435 Advanced Probability Theory (H) *(Lent Term Week 0 Exam)*
- ST439 Stochastics for Derivatives Modelling (H)
- ST440 Recent Developments in Finance and Insurance (H)
- ST441 Introduction to Markov Processes and Their Applications (H)
- ST443 Machine Learning and Data Mining (H)
- ST444 Statistical Computing (H)
- MY456 Survey Methodology (H) *(Department of Methodology)*
- MY457 Causal Inference for Observational and Experimental Studies (H) *(Department of Methodology)*
Non-statistics and non-methodology courses:

- EC484 **Econometric Analysis** (F) (Department of Economics) (**Lent Term Week 0 Exam**) *
- FM402 **Financial Risk Analysis** (H) (Department of Finance)
- FM404 **Forecasting Financial Time Series** (H) (Department of Finance)
- FM413 **Fixed Income Markets** (H) (Department of Finance)
- FM429 **Asset Markets A** (H) (Department of Finance)
- FM441 **Derivatives** (H) (Department of Finance)
- MA407 **Algorithms and Computation** (H) (Department of Mathematics)
- MA415 **The Mathematics of the Black and Scholes Theory** (H) (Department of Mathematics)
- MA416 **The Foundations of Interest Rate and Credit Risk Theory** (H) (Department of Mathematics)
- MA420 **Quantifying Risk Modelling and Alternative Markets** (H) (Department of Mathematics)

**Please note:** Other courses may be taken with the permission of the Programme Director.

*Statistics students taking EC484 will be required to register in early September in order to attend the econometrics component of the pre-sessional courses EC451. Students must pass an exam taken at the end of the pre-sessional in order to proceed to EC484.

_H = Half Unit; F = Full Unit._

Course structure - MSc Statistics (Financial Statistics) (Research)

The 12-month research branch is similar to the MSc in Statistics (Financial Statistics) 9-month programme but involves a compulsory dissertation (ST499). You must take courses to the value of four units. The compulsory courses make up three units. The remaining one unit is made up by options.

Dissertation topics are chosen in November; usually from a list provided by academic staff. Students then work on their project for the rest of the year, under the guidance of their supervisor, with a submission deadline in late August.
Course structure - MSc Statistics (Social Statistics) (9-month)

You must take courses to the value of four units. The compulsory courses make up 1.5 units. The remaining 2.5 units are made up by options.

Two compulsory courses:

- ST425 Statistical Inference: Principles, Methods and Computation (F) (Lent Term Week 0 Exam)
- ST411 Generalised Linear Modelling and Survival Analysis (H)

One optional half-unit from:

- ST405 Multivariate Methods (H)
- ST416 Multilevel Modelling (H)

Optional courses to the value of two full units from:

- Any course(s) not selected from above list
- ST421 Developments in Statistical Methods (H)
- ST443 Machine Learning and Data Mining (H)
- ST444 Statistical Computing (H)
- MY456 Survey Methodology (H)
- MY457 Causal Inference for Observational and Experimental Studies (H)
- EC484 Econometrics (F)* (Lent Term Week 0 Exam)
- GY460 Techniques of Spatial Economic Analysis (H)
- SA481 Population Analysis: Methods and Models (H)

\(H = \text{Half Unit, } F = \text{Full Unit}\)

Please note: Other courses may be taken with permission, except for: ST433, ST436, ST439, ST440, MA415, MA416, MA420 and any courses indexed FM.

The total value of non-ST courses (including any selected from the list of optional courses) cannot exceed one full unit and any unlisted courses may be taken with the permission of the Programme Director and the course lecturer.

*Social Statistics students taking EC484 are required to register in early September in order to attend the econometrics component of the pre-sessional courses EC451. Students must pass an exam taken at the end of the pre-sessional in order to proceed to EC484.

Course structure - MSc Statistics (Social Statistics) (Research)

The research branch is similar to the MSc Statistics (Social Statistics) 9-month programme but involves a compulsory dissertation (ST499). You must take courses to the value of four units. The compulsory courses make up 2.5 units. The remaining 1.5 units are made up by options.

Dissertation topics are chosen in November; usually from a list provided by academic staff. Students then work on their project for the rest of the year, under the guidance of their supervisor, with a submission deadline in late August.
Additional Programme Information

Postgraduate Course Choice, Seminar Sign Up and Personal Timetables

LSE Course Finder https://apps.lse.ac.uk/coursefinder will help you to choose which courses to take within your programme regulations. Course Finder allows you to browse available courses by unit value, keyword, department, and assessment type. You can build a shortlist of courses and compare the Lecture Timetable for that shortlist. Course Finder will be open from 10:00 on Monday 18 September 2017 to 12:00 on Monday 9 October 2017, and is available to registered students.

Once you have selected your shortlist, you must choose all of your courses, including any compulsory courses and your dissertation, in LSE for You.

Course choice opens for browsing during Welcome Week so that you can get used to the system however you will not be able to make any choices during this period. The system opens fully from Friday 22 September 2017 to fully registered students. The deadline for course choices for postgraduate students is Monday 9 October 2017. The system will re-open at the beginning of Lent Term so you can make any changes that are needed for Lent Term.

Full information on how to select course can be found at lse.ac.uk/coursechoice. Here you will find links to the programme regulations which outline your available course choices and a course guide for each of them. You will also find tutorials on how to use the Graduate Course Choice system.

Some graduate courses have been designated as ‘controlled access’ due to limited places and/or prerequisites that are required in order to study the course. You will need to apply to the department teaching the course for permission to take it using the course choice system. These courses are highlighted in the course choice system. You will be notified of the outcome of your request to take a controlled access course by email. If you have been offered a place on a controlled access course, you must use the course choice system to indicate whether you would like to accept or decline the offer within two working days of receiving the offer email. After this time the offer will expire. Your overall selection of courses is also subject to the approval of your home department.

Some academic departments allocate places to seminars centrally whilst others permit you to choose using the seminar signup facility in LSE for You. You can see which method is used for each of your registered courses in the seminar sign-up system. If you wish to change your seminar you should contact the department teaching the course for more information.

Once you have successfully registered for your courses and seminars in LSE for You, your personal timetable will be automatically generated for you. There is usually around a 15 minute delay between successful course registration and your timetable being updated.
**Interruption/Deferral/Withdrawal/Transfers/Change of Mode of Study**

*Interruption:* with approval from your department you can take a break in your studies. Interruptions are one calendar year long. You are usually required to return at the start of the nearest applicable term – be that Michaelmas or Lent term. Summer term interruptions are not possible. For more information, please see [lse.ac.uk/interruptions](lse.ac.uk/interruptions)

*Deferral:* if you complete the teaching year but have difficulties in the lead up to or during the exam period, then in exceptional circumstances you can seek to defer assessment(s) to the following academic year. For more information, please see [lse.ac.uk/deferrals](lse.ac.uk/deferrals)

*Withdrawal:* withdrawing means that you are leaving the programme permanently. Before withdrawing you may want to consider interruption so that you have some time to consider your options. For more information, please see [lse.ac.uk/withdrawals](lse.ac.uk/withdrawals)

*Programme Transfers:* you can request to transfer from your current programme to another programme at the same level according to the School’s regulations. There are usually restrictions on transferring programmes, and sometimes transfers are not possible. All transfer requests are considered by and require approval from both academic departments and the School before being authorised. For more information, please see: [http://www.lse.ac.uk/intranet/students/registrationTimetablesAssessment/Registration/Changes/transfer.aspx](http://www.lse.ac.uk/intranet/students/registrationTimetablesAssessment/Registration/Changes/transfer.aspx)

*Change of Mode of Study (for postgraduate students):* if a change in your circumstances occurs that means that you need to change your study mode from full-time to part-time, you will need to seek authorisation from your academic department. Changing from full-time to part-time study mode is generally acceptable, and your course choice will be amended according to programme regulations. Your fees will also be amended in line with the part-time fees published in the Table of Fees for the same academic year. Changing from part-time to full-time may not always be possible. Requests to change from part-time to full-time study mode will be considered on a case-by-case basis. For more information please see: [www.lse.ac.uk/PTchange](www.lse.ac.uk/PTchange)
Studying and Assessment

Assessment

Formal assessment, which counts towards your final degree results (also known as *summative assessment*), can take several different forms. Most MSc courses are primarily assessed by an unseen written examination in the summer term. A half unit course is usually assessed by a two-hour examination and a full unit course by a three-hour examination.

Some courses also include assessed coursework as part of summative assessment. Please refer to the course guides on the LSE web site to find out the assessment form for each course. When there is assessed coursework, the course tutor will give you detailed instructions for it. Further guidance on submission of assessed coursework is given below.

Assessment Criteria

Assessment criteria are descriptors of what the department expects from students, which distinguish between different grades. Postgraduate courses and degrees in the Statistics Department conform to the description in the ‘Subject Benchmark Statement for Mathematics, Statistics and Operational Research’ detailed by the Quality Assurance Agency for Higher Education. This details assessment criteria required for a student to achieve a "threshold standard" (i.e., to pass a course) and a "typical standard" (roughly sufficient for a mark of 60). Specific assessment criteria may also be confirmed verbally during lectures on a course by course basis. Should you have any queries on what is expected for a specific course as to how it will be assessed, please use staff Advice and Feedback Hours to ask your teacher directly.

**Threshold standard:**
5.13 A graduate who has reached the threshold level should be able to:

- Demonstrate a reasonable understanding of the basic body of knowledge for the programme of study.
- Demonstrate a reasonable level of skill in calculation and manipulation within this basic body of knowledge.
- Apply core concepts and principles in well-defined contexts, showing judgement in the selection and application of tools and techniques.
- Understand logical arguments, identifying the assumptions and conclusions made.
- Demonstrate a reasonable level of skill in comprehending problems, formulating them mathematically and obtaining solutions by appropriate methods.
- Present straightforward arguments and conclusions reasonably accurately and clearly.
- Demonstrate appropriate general skills.
- Demonstrate the ability to work professionally under guidance, seeking assistance when needed

**Typical standard:**
5.15 A graduate who has reached the typical level should be able to:

- Demonstrate a reasonable understanding of the main body of knowledge for the programme of study
Demonstrate a good level of skill in calculation and manipulation of the material within this body of knowledge

Apply a range of concepts and principles in loosely-defined contexts, showing effective judgement in the selection and application of tools and techniques

Develop and evaluate logical arguments

Demonstrate skill in abstracting the essentials of problems, formulating them mathematically and obtaining solutions by appropriate methods

Present arguments and conclusions effectively and accurately

Demonstrate appropriate general skills

Demonstrate the ability to work professionally with a degree of independence, seeking assistance when needed.

The Royal Statistical Society

The MSc Statistics programme has been formally accredited by the RSS for this academic year and final year students can enjoy free Student Membership of the Society. Benefits include regular email news from the RSS online magazine, Statslife (http://www.statslife.org.uk/news), access to a range of meetings and to the Society’s web resources, and information about the Society’s major residential conferences.

MSc Statistics graduates are awarded Graduate Statistician (GradStat) status, which is a formal recognition of their statistical qualifications. Please see the next section for further information.

Graduate Statistician Status

The MSc Statistics and MSc Statistics (Research) are accredited by the Royal Statistical Society.

MSc Statistics (Financial Statistics) and MSc Statistics (Financial Statistics) (Research) are ‘conditionally accredited’. This means that although an accreditation is given, it will only lead to the award of ‘Graduate Statistician’ when students have taken up a specific combination of modules as set out below:

In addition to the three compulsory courses (ST425, ST436 and ST422), students need to take at least two units out of the following four: ST405, ST411, ST416, ST421, ST443 and ST444. Graduates from either the 9 or 12 month MSc Financial Statistics programmes will need to produce a transcript showing that a satisfactory combination of modules has been taken.
Assessed Coursework

All assessed coursework is submitted using the drop box located on the 6th floor of Columbia House. When submitting coursework:

- Ensure all work is bound securely. Your teacher should issue guidance on this when the coursework is set. Although the administrative office does provide a stapler for your use it will only hold smaller pieces of work. Larger projects will need to be secured within a folder.

- You must also complete a plagiarism statement and submit this separately from your coursework. This declaration is required for coursework submitted as part of the formal assessment of a degree. It is a statement to the effect that you have read and understood the School’s rules on assessment offences and that the work submitted is your own apart from properly referenced material.

You can download the plagiarism statement from your programme Moodle page. Copies are also available on top of the drop box on the 6th floor of Columbia House.

You should also attach a cover sheet to your work. Your teacher will instruct you as to what information you should include but it should always display your exam candidate number, which is available through LSE for You. Do not write your name anywhere on your work as it is marked anonymously.

Receipt of your coursework

The drop box is emptied on a regular basis during a coursework submission period. All work submitted after the published deadline will be marked as late. Please note that even if you submit your work on the deadline date, if it is after the stated time, it will be stamped with the following day's date and treated as one day late. If you submit your coursework late please inform the MSc Administrator to prevent the coursework being missed and left in the drop box.

Following submission of your coursework, the MSc Administrator will confirm receipt by email.
Late coursework

According to the School regulations:

If a student fails to submit by the set deadline (or extended deadline as appropriate) the following penalty will apply:

Five marks out of 100 will be deducted for coursework submitted within 24 hours of the deadline and a further five marks will be deducted for each subsequent 24-hour period (working days only) until the coursework is submitted.

http://www.lse.ac.uk/intranet/LSEServices/TQARO/Calendar/GeneralAcademicRegulations.pdf

Important Notes on Plagiarism:

The work you submit for assessment must be your own. If you attempt to pass off the work of others as your own, whether deliberately or not, you are committing plagiarism. If you are found to have committed an assessment offence (such as plagiarism or exam misconduct) you could be expelled from the School.

Any quotation from the published or unpublished works of other persons, including other candidates, must be clearly identified as such. Quotes must be placed inside quotation marks and a full reference to sources must be provided in proper form. A series of short quotations from several different sources, if not clearly identified as such, constitutes plagiarism just as much as a single unacknowledged long quotation from a single source. All paraphrased material must also be clearly and properly acknowledged.

Any written work you produce (for classes, seminars, examination scripts, dissertations, essays, computer programmes) must be solely your own. You must not employ a "ghost writer" to write parts or all of the work, whether in draft or as a final version, on your behalf. For further information and the School's Statement on Editorial Help, see link below. Any breach of the Statement will be treated in the same way as plagiarism.

You should also be aware that a piece of work may only be submitted for assessment once (either to LSE or elsewhere). Submitting the same piece of work twice (regardless of which institution you submit it to) will be regarded as an offence of “self-plagiarism” and will also be treated in the same way as plagiarism.

Examiners are vigilant for cases of plagiarism and the School uses plagiarism detection software to identify plagiarised text. Work containing plagiarism may be referred to the Regulations on Assessment Offences: Plagiarism which may result in the application of severe penalties.

If you are unsure about the academic referencing conventions used by the School you should seek guidance from your Programme Director, dissertation supervisor, LSE LIFE or the Library as soon as possible.
The Regulations on Plagiarism can be found at the following web links:
- [http://www.lse.ac.uk/resources/calendar/academicRegulations/RegulationsOnAssessmentOffences-Plagiarism.htm](http://www.lse.ac.uk/resources/calendar/academicRegulations/RegulationsOnAssessmentOffences-Plagiarism.htm)
- [http://www.lse.ac.uk/resources/calendar/academicRegulations/statementOnEditorialHelp.htm](http://www.lse.ac.uk/resources/calendar/academicRegulations/statementOnEditorialHelp.htm)

Unless you are advised otherwise, all coursework submitted on the MSc Statistics and MSc Financial Statistics programmes will be uploaded onto Turnitin, the online tool used by LSE to identify textual matches between documents.

**Feedback**

Feedback is provided throughout the course of study. The method of feedback varies between modules and the following should provide you with an outline of what to expect:

**Weekly exercises**

A weekly set of homework may be set. Students will not be expected to submit this homework but will go over the exercises in the following seminar with the lecturer.

**Coursework**

Students may also complete one or two sets of formative coursework (‘formative’ means formal and informal assessment procedures conducted by teachers during the learning process in order to modify teaching and learning activities) during the year, which will be marked. A set of coursework similar to the exercises that will appear in the exam will be assigned. Feedback will be provided.

Please note that we are unable to provide feedback on written examinations.

**MSc Study Space in the Department of Statistics**

The 7th floor of Columbia House includes an open plan study space for the use of MSc students from the Departments of Statistics.

The study space has two fully networked PCs; as well as power and network points for the use of personal laptops and other electronic devices. Please take care to look after anything valuable; as the Department and the School cannot take responsibility for stolen or damaged items. Please ensure that the space is kept clean and tidy for the benefit of all MSc students who will be using it. Misuse of the space of any kind will not be tolerated. As the space is adjacent to academic offices, please also ensure that noise is kept to a minimum.

**Textbooks**

All textbooks that are essential for the courses are available from the Library and from Waterstones Economists’ Bookshop in St. Clements Building.
Examination dates

With the exception of those examinations that are scheduled during Lent Term Week 0 (see page 17), Summer examinations normally take place between the first week of May and the first week of June. The course-by-course examination timetable will be published on the LSE website by the end of Lent Term. Student’s individual timetables will be published on LSE for You very early in the Summer term. Further details of exactly when these become available will be circulated nearer the time.

Some important points to note:

- If a student has to re-sit or defers an examination the next opportunity to do so will be in the next academic year during the equivalent examination period as the original failed or deferred examination.
- There is no provision for exam scripts to be remarked and you are not allowed to access any of your exam scripts. However, you can request an administrative mark check (a small fee is charged) if you are a borderline mark or failed the exam.
- No exam results are disclosed before the official exam result publication date and results can never be given out via email or phone.
- You will not be able to be re-examined in any course which you have already passed.
- If you do not complete all aspects of a course i.e. hand in your assessed work, then you will be deemed incomplete and will receive ‘0’ marks for that particular course and have to re-sit the missing element the following year.

Results and transcripts of results

The School releases confirmed marks once the relevant School Board of Examiners has ratified them. For further information, please see lse.ac.uk/results.

To ensure that your results are released as scheduled, please check your balance on LSE for You to see if you have any outstanding fees. You should contact the Fees Office on fees@lse.ac.uk if you have any queries, as the School will not release your results if you have an outstanding debt.

Transcripts for finalists are issued digitally within ten working days of publication of final results. Continuing students will be able to request an 'intermediate transcript' of results as soon as they are officially published.

For more information, please see lse.ac.uk/transcripts.

Graduation Ceremonies

Graduation ceremonies are held twice a year: in July for students who have followed undergraduate or 9- or 10-month taught postgraduate degree programmes and in December for students who have followed 12-month taught postgraduate degree programmes. MPhil/PhD research students are presented at both the July and December ceremonies, in July for those awarded by 30 April and in December for those awarded by 30 September.

For more information, including the dates of future ceremonies and details of the School's overseas ceremonies, please see lse.ac.uk/ceremonies.
Degree Certificates

The degree certificate gives your full name, level of award, programme of study, and class of degree or other award obtained.

It will be available for collection on the graduation ceremony days of the relevant graduation period in July or December. If you don’t collect it at the ceremony, it will be posted to your home addresses within eight weeks. It is therefore essential that you keep your details up-to-date on LSE for You.

For more information, please see lse.ac.uk/degreeCertificates

MSc Student Prizes

The Department of Statistics has teamed up with Winton to award two prizes to MSc Statistics/Financial Statistics/Social Statistics and MSc Statistics/Financial Statistics/Social Statistics (Research) students. Each prize is worth £500 respectively.

The first prize is the ‘Winton Prize for Academic Excellence in MSc Statistics/ MSc Statistics (Financial Statistics)/MSc Statistics (Social Statistics)’. This prize will be awarded to the MSc Statistics student with the highest overall marks in their exams.

The second prize is the ‘Winton Prize for Best Dissertation in MSc Statistics/MSc Statistics (Financial Statistics)/ MSc Statistics (Social Statistics)’. This prize will be awarded to the MSc Statistics/Financial Statistics (Research)/MSc Statistics (Social Statistics) (Research) student with the highest mark in their dissertation.

The Royal Statistical Society also provides an annual prize to the MSc Statistics or MSc Financial Statistics student which is awarded to the student with the second highest overall results. The prize is a years’ free graduate membership of the RSS. Note that in order to qualify for this prize, the student in question will need to be eligible for Graduate Statistician Status (see here for more information). If this is not the case, the prize will be awarded to the eligible student with the next highest mark.

These prizes will be discussed at the October exam board (following confirmation of the 12 month research student exam results) and a winner will be chosen in agreement with the MSc Statistics/Financial Statistics/Social Statistics Sub-board members and the School’s External Examiner. The winners will be notified as soon as possible after a decision has been made.
The School has regulations, policies and procedures covering many aspects of student life and you should familiarise yourself with them.

Some of the regulations explain the organisation and conduct of your academic study. These include information about the structure of programmes, assessment, graduation and what to do if illness affects your studies.

The following web searches/web links detail the School's Programme Regulations.

- Regulations for Diplomas
- Regulations for First degrees
- Regulations for the consideration of appeals against decisions of boards of examiners for taught courses
- Regulations for research degrees
- Regulations for Taught Masters degrees (entering in or after 2009/10)
- Regulations for research degrees
- Regulations on assessment offences: other than plagiarism (i.e. Exam Misconduct)

And the following web link gives you an A-Z list of relevant regulatory documents where you can find further details of all School Regulations.

http://www2.lse.ac.uk/intranet/LSEServices/policies/home.aspx

What to do if you are ill during your studies:

Information about the School's procedure can be found here:
