

Improve your organisational performance with the *Handbook of Management Accounting*, 5th edition

With the current emphasis on cashflow, more and more organisations are looking to their management accountants for operational and strategic advice.

Given the rate of change in best practice, not only do organisations need to monitor the rapidly changing external environment, they need to add value by assessing and applying management accounting developments which are relevant to their business.

Handbook of Management Accounting meets the challenge.

Being both a handbook and an instructional manual, it assists managers in business and management accountants, to acquire knowledge of current best practice in larger or more sophisticated organisations. It covers a variety of industries and markets and provides extensive cross-references, so that readers are directed to topics of related interests.

Handbook of Management Accounting is:

- **action oriented** – it focuses on how management accounting techniques can operate in organisations and stresses therefore an understanding of the behavioural, strategic, institutional and political factors which should be considered;
- **considered** – gives an intelligent and informative analysis of management accounting issues as they are encountered in practice;
- **proactive** – discusses the forces which affect enterprises today, including globalisation, the digital economy, wireless technologies, and the growing pressures for organisations to address issues of corporate governance, risk management and sustainability as well as the challenges which times of extreme financial crisis bring.

This new edition of *Handbook of Management Accounting* gives practitioners in management accounting, as well as managers relying on their finance function, the most valuable and current resources.

Place your order for *Handbook of Management Accounting* today and you will start to save time and money. Simply fill in your requirements on the order form overleaf. Alternatively you can call us on **0844 561 8166** or e-mail us at **customerservices@cch.co.uk**.

Yours faithfully,

Nicole Johnson

About the author:

Alnoor Bhimani is Professor of Management Accounting at the London School of Economics. He possesses an MBA from Cornell University where he was a Fulbright Scholar and holds a PhD from LSE. He is also a Certified Management Accountant (Canada) and author of 15 books and over 100 articles.

Extensive changes and additions to the 5th edition of *Handbook of Accounting Management* include:

- extensive coverage of the impact of globalisation, digitisation and web-based technologies, sustainability related to management accounting, corporate governance and new approaches to performance management
- new sections on the strategic scorecard, corporate performance, transfer pricing issues, environmental performance tracking, strategic accounting and performance systems, customer profitability and quality costing dimensions. And more updates to the technical sections of the handbook
- the handbook now takes account of not just technical aspect of implementation but also behavioural, institutional and political issues – it embeds the field in the domain of management rather than just retaining the accounting and information provision angle
- the references are now much more current and wider to give readers a more up to date and comprehensive guide to more detailed resources.

Who should buy this book

Management accounting practitioners, management and accounting students interested in practice and managers seeking more from the finance function in their firms.
