

MSc Management, Information Systems and Innovation

A new degree starting in 2011 at the London School of Economics

Information systems drive modern business, public services and information services. Information systems link IT with organisations and society. The Internet has changed forever how we gain and share information. Knowledge in the networked society crosses all boundaries; challenging all previous models.

Companies and government agencies demand highly qualified graduates who understand both changing technologies and how organisations can engage with and exploit them. By studying **MISI** you will learn how to manage innovation and the introduction of new information systems to realise the gains and avoid the pitfalls.

LSE is the world's leading social science university and the Information Systems and Innovation Group has led the Social Study of Information and Communications Technologies. The Group is part of LSE's highly regarded Department of Management.

Our staff are experts in: Global Sourcing; Identity, Security and Privacy; E-business; IT in Developing Countries; Cloud Services; Mobile Computing; Open Source Development; Health Informatics; Information Growth: and much more.

Our students come to London from all over the world and go on to senior posts in finance; government; NGOs; consultancies; manufacturing and leading universities

MISI Entry requirements

Students should have the equivalent of an upper second class honours degree or an equivalent overseas qualification, see [LSE Graduate Prospectus](#).

We admit students with diverse academic backgrounds. These include business studies and computer science graduates, but students are also welcome with other degrees where they are wishing to transfer their focus towards management, the internet and innovation.

All graduates of non-UK institutions must submit GRE or GMAT. We also have [English language requirements](#) for students whose first language of study is not English.

How to apply to **MISI** :

There is one intake onto the course per year, in October, There is no deadline, but early application is advised. Please see the [LSE Graduate Admissions website](#) for more information on how to apply and details of fees.

The Structure of **MISI**
