

RECYCLING/REUSING

Did you know you can recycle **batteries** in the 32LIF Reception?

There are also plenty of other places in the campus. Find out more [here](#).

Why recycle batteries?

They contain dangerous chemicals that when leak into the ground in landfill sites, they cause soil and water pollution.

When recycling them, the materials of each battery will be used to make something new.

Do you have **stationery** that you **don't** use?

Please **drop it** in the **box!**

Unused or 'boring' **stationery** can be recycled=reused by placing it in the allocated box in the post room.

Look out for the box with the poster on the left!

There is also another box in the post room if you would like to donate your **plastic bags** for reuse. If you prefer to keep them because you will reuse them, have a look here at how to [fold](#) them into tiny triangles and save up space!

SKYPING/TELECONFERENCING

One of the major negative impacts on the environment is caused by travelling!

Staff are encouraged to use **Skype** or any other methods of **video and web conferencing**.

IMT have a bookable Video Conference facility in Tower 1.

It can be booked via the [AV Unit](#) by emailing imt.AV.Support@lse.ac.uk, who will also be able to advise on prices, equipment and availability. [Further information](#).

DARIA'S HEALTH TIP: Keep Insects Out of the Kitchen using lemons

Squirt some lemon juice on door thresholds and windowsills. Then squeeze lemon juice into any holes or cracks where the ants are getting in.

Finally, scatter small slices of lemon peel around the outdoor entrance. Lemons are also effective against roaches and fleas:

Simply mix the juice of 4 lemons (along with the rinds) with 1/2 gallon (2 liters) water and wash your floors with it; then watch the fleas and roaches flee. They hate the smell.

MIRIAM'S HEALTHY EATING TIP

GREEN EVENTS/VENUES: Sustainable Restaurant of the Year 2015

The Sustainable Restaurant Association (SRA) Awards are an annual celebration of everything that is good about the food-service industry and the people in it.

This year the winners of awards were 2 restaurants: [Daylesford](#), which operates three organic cafés in London (Notting Hill, Kensington, Selfridges) and

[The Captain's Galley](#), Britain's most northerly mainland restaurant that strictly serves seafood in season.

Many thanks,

The Green Team of the Department (Miriam, Rachel, Gary, Daria and Kalliopi)
