Subject: Green for Beginners 2

The audit from the LSE Green Impact team was on 19 March (it was not that scary and the result showed great improvement compared to last time!)

Remember the four colours!

Useful Tips: for coffee grounds

- dry coffee grounds and sprinkle them in potted plants or the garden; they encourage plant growth and act as a repellent for slugs
- Miriam's green beauty tip: use coffee grounds as a basis for a natural body and face scrub (mix them with essential oils of your choice)

Interesting facts (sources: [Random Facts](#); [Do Something](#))

- Recycling **one aluminium can** saves enough energy to run a television for three hours or to listen to a full album on your iPod.
- Recycling **one glass bottle** saves enough energy to light a 15-watt energy efficient bulb (equivalent to 100-watt normal bulb) for 24 hours whilst it would take 1 million years for the bottle to biodegrade.
- The **average person** generates over 4 pounds of trash every day (almost 2 kilos) and about 1.5 tons of solid waste per year.

DON'T FORGET! Give your used stamps in 1.01 (Gary) as they are [donated to charity](#).
This year stamps are being sent to [Help for Heroes](#).

Many thanks,

The Green Team (Miriam, Siân, Sam, Kalliopi)
