MIRIAM'S BEAUTY TIP for hot summer days: To calm down irritated red skin and small rash from the sun use ice cubes. Massage the ice around your face and neck until it melts. Ideally, apply morning and evening on clean skin. Cold green tea used as spray or wash also helps to calm the skin.

DARIA'S HEALTH TIP: Although oregano contains the vitamins and nutrients required by the immune system, its primary benefits are owed to its carvacrol and rosmarinic acid content. Both compounds are natural decongestants and histamine reducers with direct, positive benefits on the respiratory tract and nasal passage airflow. The oil of oregano fights off the dangerous bacteria *Staphylococcus aureus*, better than the most common antibiotic treatments.
