

BANK FINANCING BOOTSTRAP ENTREPRENEURSHIP

Saved by the banks? Growth challenges and
investment initiatives in the Balkans

Ivo Bićanić and Dora Tuđa
Faculty of Business and Economics
University of Zagreb

November, 2012

Real GDP growth rates (2000 constant prices), 2008.-2011.

Average real GDP growth rates (2000 constant prices), 2001.-2011.

Source: World Bank Database

Four features

1. The Linda Evangelista syndorm and ureasonable expectations
2. The entreprenurial deficit and preferance for state jobs
3. Inward looking optics and closed liberalization
4. Gerschenkron dissapointed and increased latecommer hurdles

Entrepreneurial deficit

TEA NECESSITY

TEA OPPORTUNITY

Source: Šošić et al (2012)

Composite index of entrepreneurial activity (average 2002-2010)

⁴ Bolivia and Vanuatu are not showed in this figure, because their TEA rates are outsiders.

Source: Šošić et al (2012)

Inward looking optics

* Kosovo 2006-2011

Source: World Bank Database

Convergence horizons

Convergence horizon, average GDPpc growth rates*

* Estimated catching-up time based on average GDP per capita growth rates (2005 constant prices, PPP) 2000.-2011.

Source: Authors' calculations from WB Database

Required investment and growth

Actual/required domestic investment, 2011.*

* 100=4% real GDP growth rates, based on national ICOR and 6% capital amortization

Source: Authors' calculations from WB Database

Mannas from heaven
