

# Privatizations: Auction and Market design during a Crisis

**PROFESSOR VASILIKI SKRETA**

Professor at the Economics Department,  
University College London

**Tuesday, 17 March 2015  
18.00-19.30**

**ABSTRACT:**

This talk has three main goals. First, offer a framework to think about the costs and benefits of privatizations, based both on theory and on empirical evidence. Second, provide insights from economic theory on how best privatizations should be organized. Third, give an account of privatizations in Greece, both pre and during the crisis.
