<p>Weekly Test</p> <p>The weekly test is carried out by our in house Maintenance Technicians as per the above schedule.</p> <p>An Estates Maintenance Technician will attend the building each week at the same designated time, and will conduct the weekly fire alarm test in accordance with the requirements laid out in British Standard BS 5839. A different manual call point will be used during each weekly test, so that all call points in the building are tested in rotation. The test will confirm that the control equipment is capable of processing a fire alarm signal and providing an output to fire alarm sounders and to ensure that the fire alarm signal is correctly received at our Main Security control room.</p>
