JONATHAN LIEBENAU, PhD

Jonathan Liebenau teaches at the London School of Economics in the Department of Management. He specializes in two areas: fundamental concepts of information, and the problems and prospects of information and communication technology in economic development. He has previously worked in academic administration, technology policy, and the economic history of science-based industry, all positions in which he has emphasised the use of information in organizations. He is the author or editor of several books and over 70 other major publications and has provided consultancy services to leading companies and strategic government agencies, including Dell, BT, IBM, Microsoft, Tata Consultancy Services, Nortel, EDS, Lloyd Thompson, and in the UK Government, the Office of Science and Innovation, the Department of Trade and Industry and the Home Office. He also has worked with the Royal Society for the Arts and DigitalEurope, and is on the advisory boards of Istanbul Bilgi University and American University in Cairo, School of Business.
