Internet for Kids Programme

May 2014

EU Kids Online seeks to enhance knowledge of European children's use, risk and safety online

Released today

New Report: Policy influences and country clusters: a comparative analysis of internet safety policy and implementation:

- Maps internet safety policy and implementation in our four country clusters
- Reveals a divide between parts of Europe that enjoy better or lesser public support for internet safety.
- Finds that 'Unprotected networkers' and 'Semi-supported risky networkers' country clusters display uneven commitments, with lower levels of investment, coordination and public sector involvement.
- Recommends that support for a broad and coordinated spectrum of activities involving multiple stakeholders and using diverse methods is vital.

To be released next week

Major new report: Meaning of online problematic situations: results of qualitative cross-cultural investigation in nine European countries

Recently announced

Presentation to the ICT Coalition, Brussels:

- Rise in cyberbullying, especially for girls, though offline bullying is still greater
- A rise in exposure to negative user-generated content
- A rise in the percentage who self-report exposure to harmful experiences online
- Overall decline in digital safety skills among youth

Book: Towards a Better Internet for Children: Policy pillars, players and paradoxes.

Report: Preventive measures – how youngsters avoid online risks.

[Report](#): Risks and safety on the internet: Comparing Brazilian and European findings.

[Report](#): Innovative approaches for investigating how young children understand risk in new media.

[Report](#): Russian kids online.
