

[Steve Rayner](#) is James Martin Professor of Science and Civilization at the [Saïd Business School](#) and Director of the [Institute for Science, Innovation and Society](#), part of the [James Martin 21st Century School](#). He is also Principal Investigator for the [Oxford Programme for the Future of Cities](#).

His expertise is in the governance of emerging technologies, management of environmental and technological risk, and the relationship between nature and society as mediated by science and technology. Rayner has co-authored or edited numerous publications covering a broad field, including social and market impacts of technologies, technology acceptance, risk management, global and local environmental impacts and policy, economic recovery and development, land use, energy policy, industrial ecology and public engagement with science. Before coming to the University of Oxford in 2002, he spent two decades in the United States developing and leading interdisciplinary research programmes spanning the social and natural sciences.

Rayner is an Honorary Professor of Climate Change and Society at the University of Copenhagen and a member of the Advisory Committee to the UK Climate Impacts Programme. He was previously a member of the Royal Society Working Group on [Geoengineering the Climate](#) and the [Royal Commission on Environmental Pollution](#), as well as a lead author on the [Third](#) and [Fourth](#) Assessment Reports of the [Intergovernmental Panel on Climate Change](#), winners of the [2007 Nobel Peace Prize](#). In 2008, he was listed by Wired Magazine as one of the [15 people the next President should listen to](#).
