

New Directions in Science and Technology Studies

This event brings together scholars to discuss new directions in science and technology studies. The conversation will be inspired by the work of Gabrielle Hecht and Paul Edwards who will present and discuss their current research. Participants of the event are encouraged to reflect about how STS contributes to the humanities and social sciences and, through these, to the analysis of global controversies.

When: 8 March 2013, 13:30-17:00

Where: Robert McKenzie Room (STC S202), Department of Sociology, Second Floor, St Clement's Building, London School of Economics and Political Science

13:30-15:00 Technopolitics in the nuclear era - a conversation with Gabrielle Hecht

15:00-15:30 Coffee / informal discussion

15:30-17:00 Global infrastructures and the politics of climate change - a conversation with Paul Edwards

Please RSVP - places are limited: email Anna Johnston a.johnston@lse.ac.uk

This event is organized as part of the Economies, Risk and Technology research cluster of Sociology @ LSE.
