

Decision Framing and Uncertainty Network Workshop

Intent

Building on the successful workshop held in [February 2016](#) (see also [White Paper](#)), The Centre for Environmental Policy (CEP) at Imperial College London has teamed up with specialists from Warwick University, London School of Economics, Lancaster University, E3G, UK Government and Atkins and is hosting a workshop to develop a better understanding as to what Decision Makers want from the Analytical Community to make better decisions under uncertainty. The workshop will form the basis of an ongoing network which will seek to build a value proposition around Decision Makers and the User Community. Attendance at the workshop will assist in the shaping of that value proposition.

Schedule Brief

TUESDAY 27 FEBRUARY

- **Presentations** from industry, policy making, and academic analysts
- **Participatory Simulations** to explore decision making under risk and uncertainty:
 - Emergency response decision making
 - Investment horizon decision making under policy (Brexit) uncertainty
 - Investment horizon decision making using scenario tools
- **Panel Session** to understand what decision makers really want from the analytical community
- **Buffet networking supper**

WEDNESDAY 28 FEBRUARY

- **Simulation feedback** from specialists using a diagnostic framework to facilitate identification of needs

-
- **Open Forum** “What next for the community?”: Highlighting areas for future research and collaboration

Outcomes

The confirmed specialists attending are from the following domains and disciplines: Expert Judgement, Psychology, Statistics, Decision Science, Communications, as well as a number of decisionmakers from government, industry and policy. Please RSVP [here](#).

In order to assist in the development of the workshop and the network, participants are also requested to complete a [practitioner’s survey](#).

Registration is now closed.
