

Social science helps us

Define radical uncertainty

- When do traditional analysis methods fail us?
- How can we outline the limitations of today's science?
- What can we do instead?

Our instigation of the CRUISSE Network, funded by EPSRC, has generated a remarkable community of practice centred around the need to develop new ways of thinking and new analysis methods for today's interconnected challenges.

Tuckett et al (2020). Confronting Radical Uncertainty: A New Research Framework for Risky Decision-Making and Decision Support. *In preparation*.
