

We can help to

Reduce heatwave risks

- Can we predict a heatwave in Pakistan with enough advance notice to save lives?
- How can humanitarian agencies balance advance notice with uncertainty of outcome?

CATS researchers have collaborated with the Start Network, a group of humanitarian NGOs, to improve their use of weather forecast data and support anticipatory humanitarian actions to save lives and money.

Erica L. Thompson and Leonard A. Smith (2020). Informing anticipatory humanitarian action: a framework for using forecasts effectively. *In preparation*.
