

We can help to

Use AI in civil litigation

- How can we reduce costs to stakeholders in civil litigation?
- Can we describe the dynamics of insurance claim disputes using game theory?

There is an eagerness at national level to help make civil litigation more streamlined, cutting time and cost for litigants and lawyers. Our model-based decision support systems use expert judgment to triage liability.

This is a research project funded jointly by the law firm BLM LLP and the LSE KEI fund.
