2019 LSE-Warwick Workshop on Search Games

Organisers:
Katerina Papadaki, LSE (k.p.papadaki@lse.ac.uk)
Steve Alpern, Warwick (s.alpern@wbs.ac.uk)
Thomas Lidbetter, Rutgers (tlidbetter@business.rutgers.edu)

Search games are concerned with a game theoretic approach to search problems. Apart from natural applications in the realm of security and search-and-rescue, search games have connections to resource allocation, patrolling, bounded-resource reasoning and scheduling theory. The workshop will feature a combination of presentations, an open problem session and plenty of time for informal discussions.

Venue: Graham Wallas Room, LSE
Dates: 27-28 June 2019
Participation: by invitation only
To register: email k.p.papadaki@lse.ac.uk
Registration closes: 27 May 2019
