

REGIONAL COOPERATION IN HEALTH ACROSS AFRICA

REGIONAL ORGANISATIONS BY DATE OF ESTABLISHMENT

REGIONAL ORGANISATIONS MAPPED BY LOCATION OF HEADQUARTERS

REGIONAL ORGANISATIONS BY REGIONAL COVERAGE (BASED ON THEIR MEMBER STATES)

REGIONAL STRENGTH

124 organisations are currently active, with notable growth in the 1960s and 1970s and in the 1990s and 2000s.

INFORMATION DEFICIT

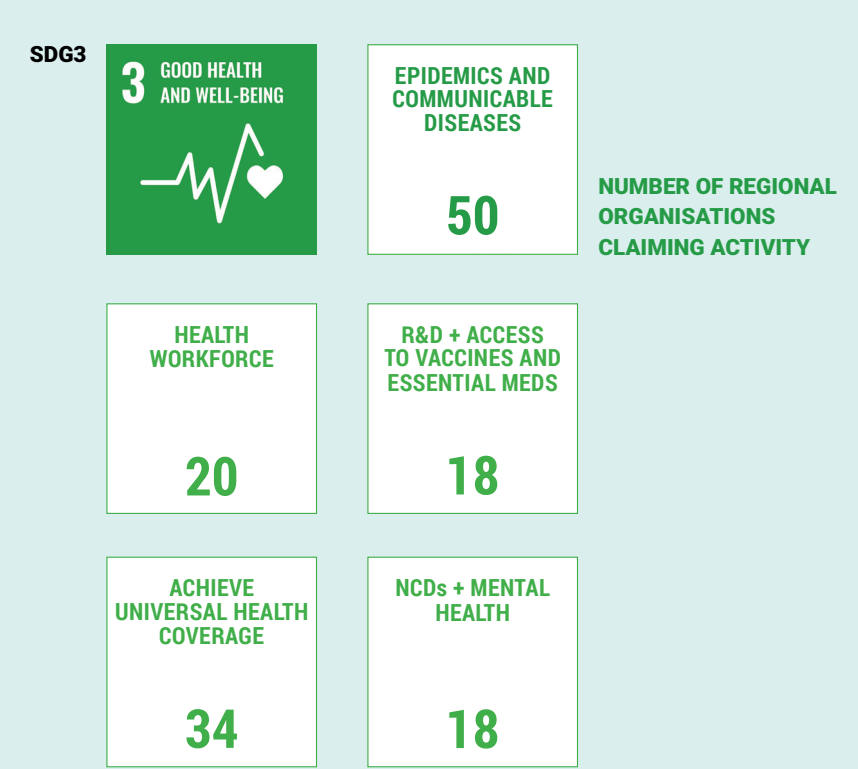

15 per cent of organisations had no website, 38 per cent had website functionality issues and 14 per cent had limited detail available on their websites.

HIDDEN HEALTH

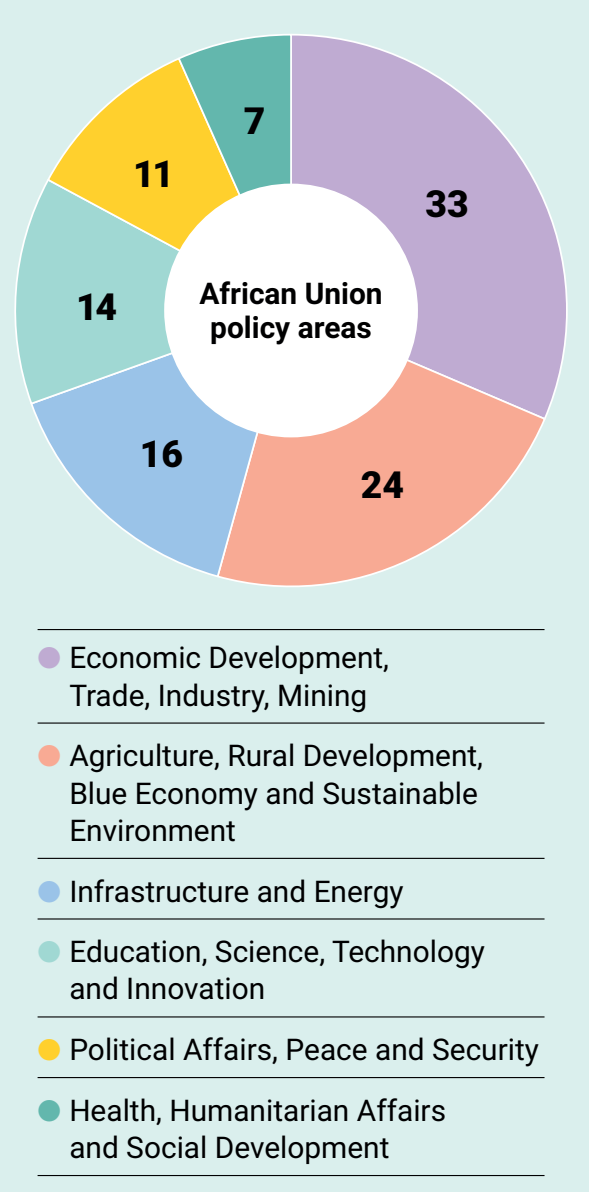

Only seven organisations cite health as their primary focus, but 40 per cent undertake substantial health activity across health-related sustainable development goals (HRSDGs).

COVID-19 highlighted the need for multilateralism in health and resilience in health. But little is known about the type or scope of health activity undertaken. By mapping regional organisation health activity on the continent across health-related Sustainable Development Goals (SDGs), we can better understand their potential to bridge governance gaps and respond to health challenges, in Africa and beyond.

TOP FIVE AREAS OF REGIONAL HEALTH ORGANISATION ACTIVITY WITHIN SDG3

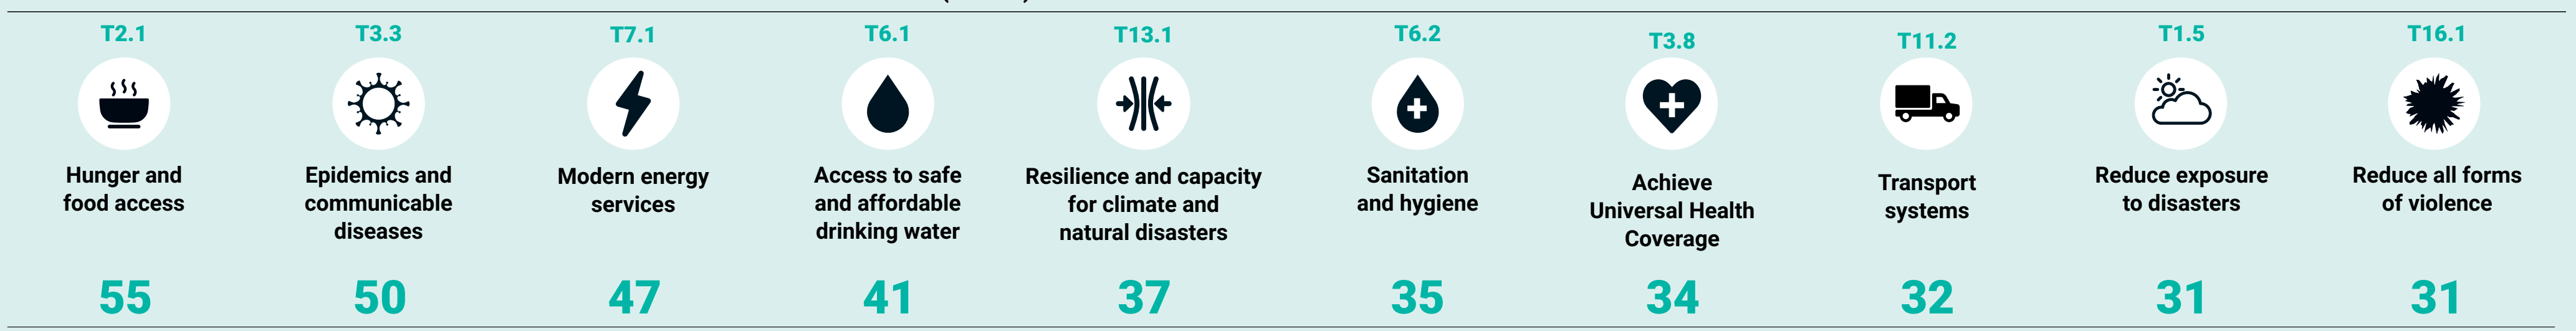

REGIONAL ORGANISATIONS BY PRIMARY POLICY FOCUS AREA

HEALTH-RELATED SDG TARGET

TOP 10 AREAS OF REGIONAL ORGANISATION HEALTH ACTIVITY BY HEALTH-RELATED SUSTAINABLE DEVELOPMENT GOALS (HRSDG) TARGET
