# Environmental Diplomacy

Dr René Castro

*Minister for Foreign Affairs for Costa Rica*

Professor Stuart Corbridge

*Chair, LSE*

LSE events

# Eco-diplomacy: critical for Costa Rica's sustainable competitiveness

*Dr. René Castro*

*Rene.castro.cr@gmail.com*

*London, January 2011*

# Eco-diplomacy definitions

- ◆ Some very important environmental problems which transgress our national boundaries, require international environmental cooperation...in other words ecodiplomacy.
- ◆ Many global environmental problems such as the impacts of climate change, the preservation of biological diversity, and trans-boundary air pollution demand multilateral responses

(Ref: Sascha Muller-Kraenner, director Heinrich Boll Foundation, 1999), German Green Party

(Ref: Paul Hagen, The Environmental Forum, 2010)

# Ecodiplomacy 7 distinguishing factors

1. The Nature of the subject matter: from global to interdependency\*
2. The Role of Science and Scientist: Uncertainty\*
3. The Complexity of Negotiations: local and multilateral impacts\*
4. The Unique equity issues involved: North-South, rural-urban, intergenerational\*
5. Innovative features and approaches: CDM\*
6. Large number of players: from Ozone initial 24 parties to UNFCCC 150 \*\*
7. Ever increasing Role of the Media: Fish bowl\*\*

\*Ref: Ambassador Richard Benedick, US, chief negotiator for the Montreal Protocol on Ozone Depletion

\*\*Added by Rene Castro, CR, Chief negotiator for the UNFCCC Kyoto Protocol

# Traditional priorities for a country

1. Security\*
2. Economics\*
3. Social Domestic Issues
4. Something ??
5. Something else ???
6. Local Environment\*
7. Global Environment and Commons\*

*\*Ref: Ambassador Richard Benedick, US, chief negotiator for the Montreal Protocol on Ozone Depletion*

# Country's and Corps sustainability approach\*

## MACROECONOMY

Economy

Ecoefficiency

Sustainability

# **Is Ecodiplomacy Changing countries' and Firms' Strategies?**

# Financial Crisis: Inflation and oil prices

Sources: Haver Analytics; IMF Primary Commodity Prices database; and IMF staff calculations.

<sup>1</sup>Simple quarterly average of prices of U.K. Brent, Dubai, and West Texas Intermediate crude oil.

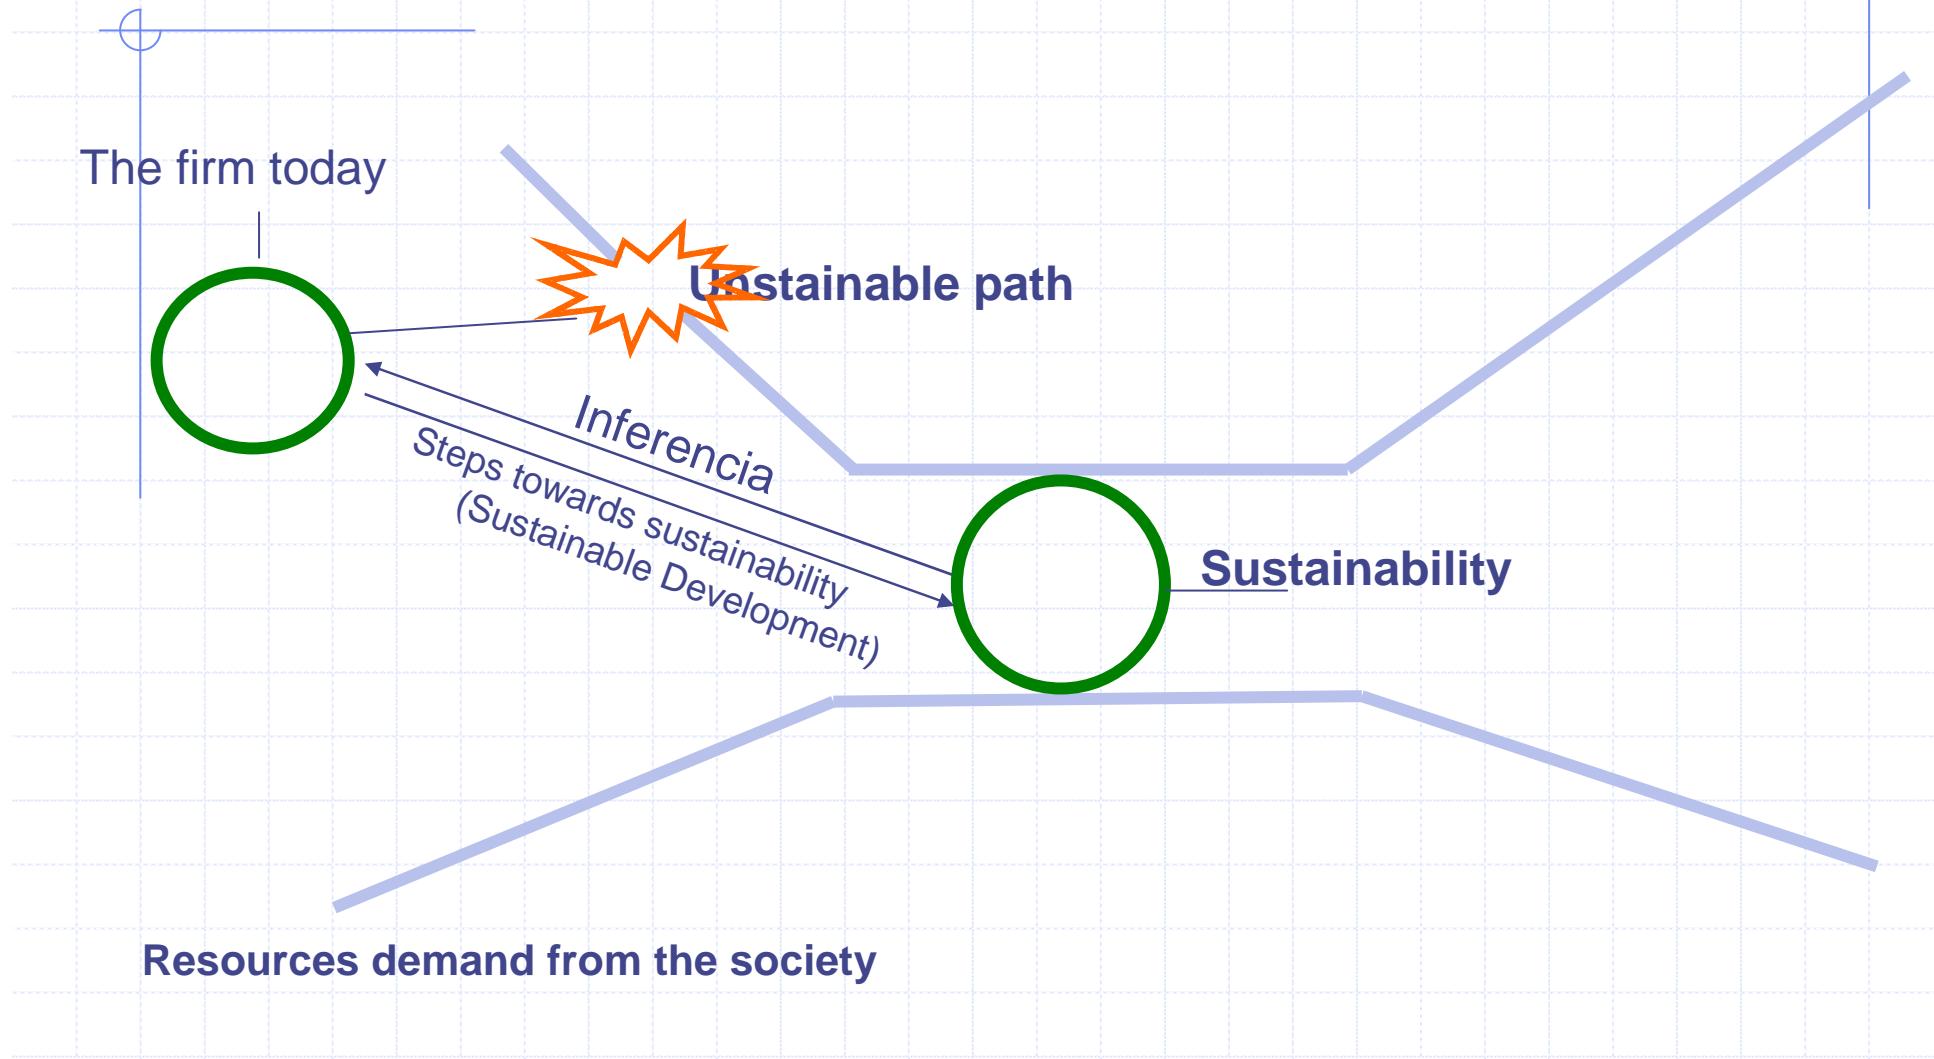

<sup>2</sup>Twelve-month percent change in the core CPI index. Aggregates are computed on the basis of purchasing-power-parity (PPP) weights.

# Water Wars: The possible flashpoints are the Nile, Niger, Volta and Zambezi basins

- ◆ The report predicts that population growth and economic development will lead to nearly one in two people in Africa living in countries facing water scarcity or what is known as 'water stress' within 25 years (BBC, Nov 15, 1999).

# The Funnel analogy

Availability of resources and the ability of eco-systems

# Example #1: Car industry

Leaving dead?

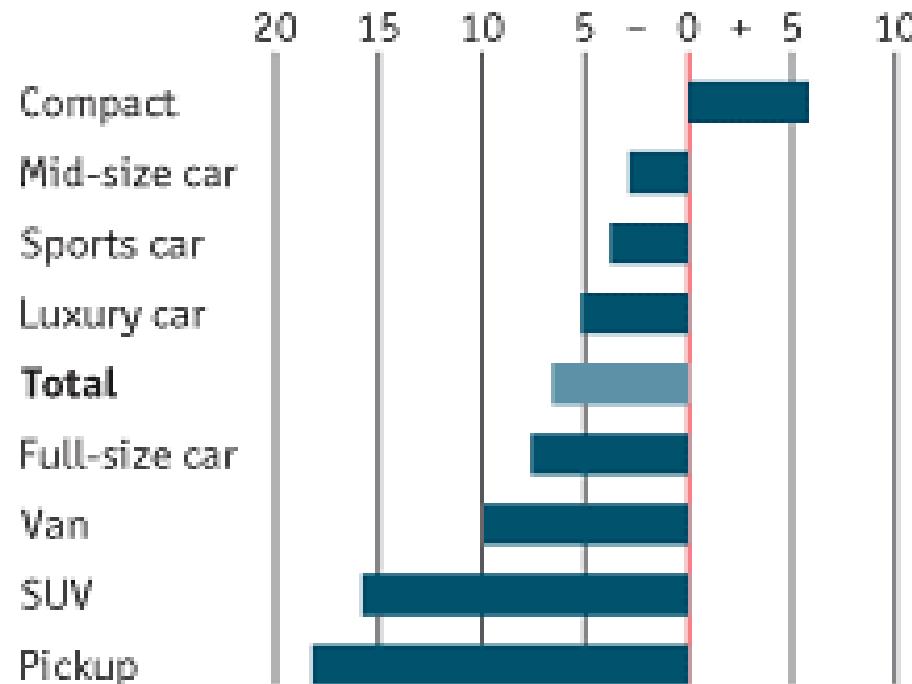

Survivor?

# Fact: Used cars market value plummeted for most

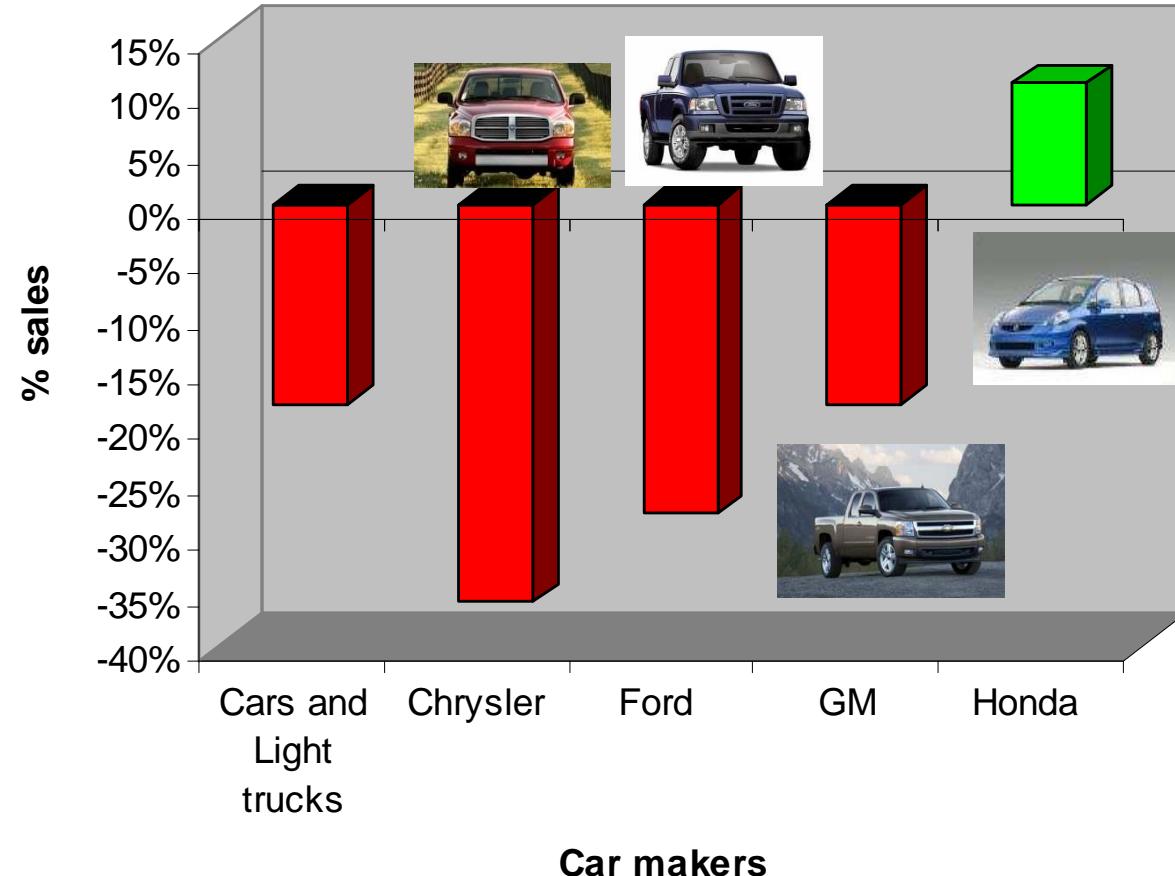

Going, going...

# Even some ugly hybrids have a chance

Compare Old and New EPA MPG Estimates

**2000 Honda Insight**  
Manual (5 speed)  
3 Cylinders  
1 Liters  
Regular Gasoline

[Look up another car ▶](#)

New MPG tests are more realistic 

**Hybrid Vehicle**

New EPA MPG	Old EPA MPG
53 49 City	65 61 City
61 Hwy	70 Hwy

MPG Estimates from Drivers Like You  
Average based on 17 vehicles.  
**62.3**  
Lo **48** → Hi **92**  
[View Individual Estimates](#)

*Additional Vehicle Characteristics: Front-wheel drive , S/I  
Combined MPG estimates are based on 45% highway and 55% city driving*

*Use the new EPA MPG estimates to compare to 2008 and later model year vehicles. The old EPA MPG estimates are listed on the window stickers of 2007 and earlier model year vehicles.*

## Example 5: Conflicts versus innovation

Military occupation and damage of  
Costa Rican territory by the  
Government of Nicaragua versus  
Aerospace regional programs

October 27, 2010

# Costa Rica has both limited defense and null attack capabilities

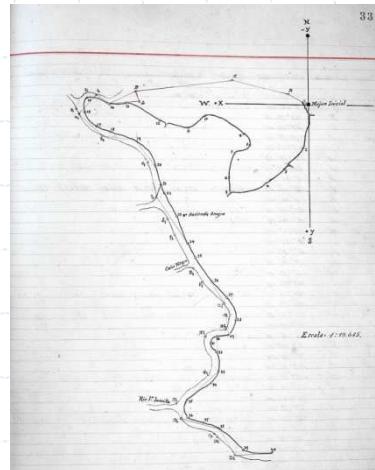

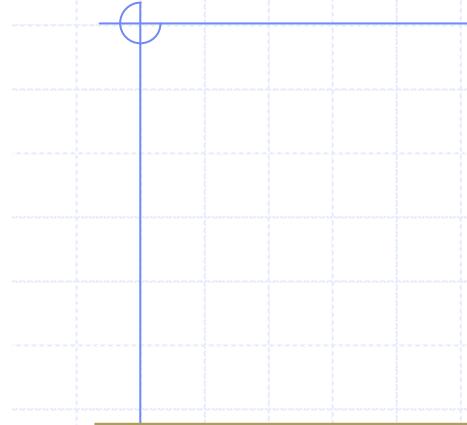

Nicaraguan Military Gunship MI-17; used to transport troops to Costa Rican territory

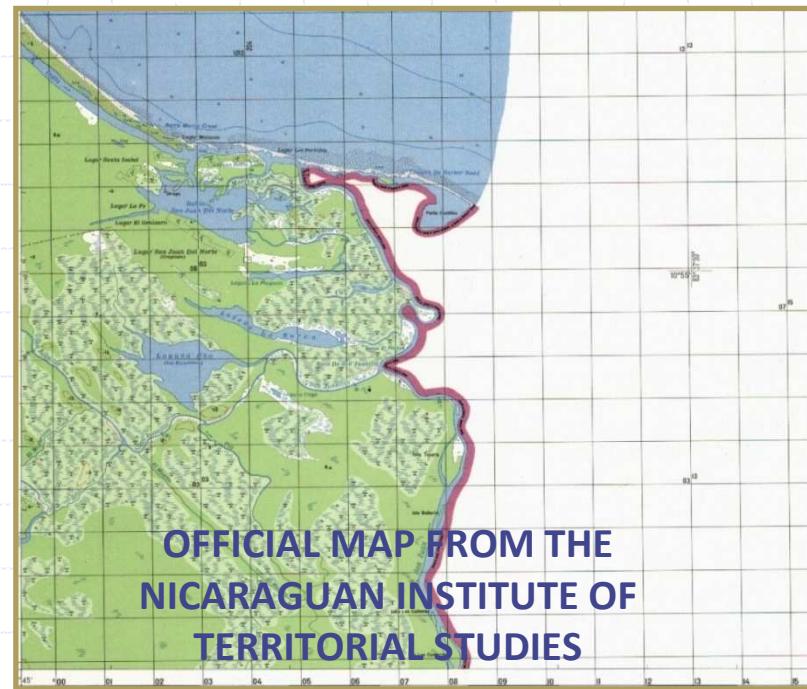

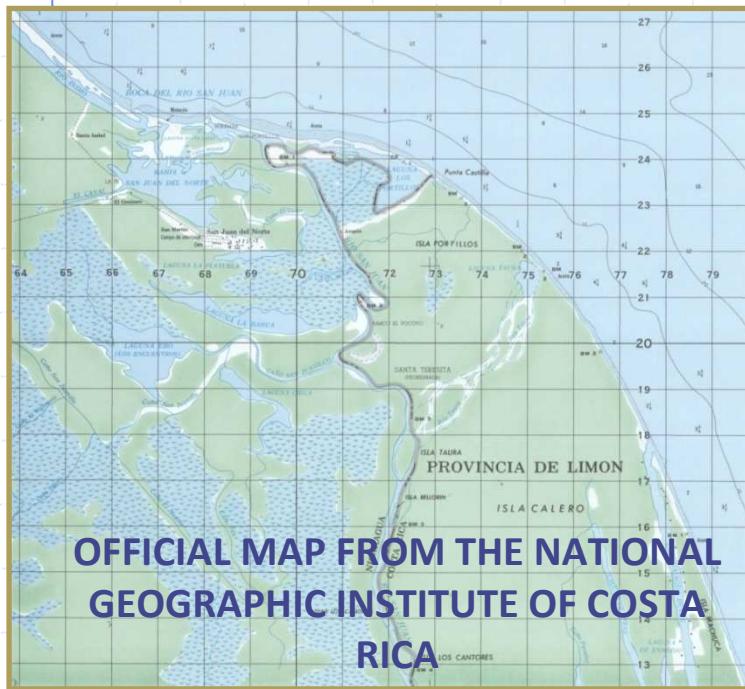

Civil helicopter *rented* by the Costa Rican police forces, to transport policemen to the area occupied by Nicaragua today

# Effective cartographic comparison between both official sources, and the sketch of the “Alexander Award” (1898)

“ Alexander Award”  
Award X of March 2, 1898  
Volume I, page 33

## Increasing sediment deposits and troops presence in Costa Rican territory since October 27, 2010

November 8, 2010

November 11, 2010

November 14, 2010

November 26, 2010

November 11, 2010

A man-made canal through  
Costa Rican territory from  
Harbor Head (Laguna Los  
Portillos in Spanish) to the San  
Juan River

November 14, 2010

November 26, 2010

# Aerospace and Climate Change

- ◆ Developing new technologies that either have a role in reducing emitted CO<sub>2</sub> or improving resilience and adaptation to climate change.
- ◆ The Government of Costa Rica is supporting the emerging national aerospace industry: Ad Astra Rocket Company, ACAE, CORAAL.
- ◆ Central America Aerospace Cluster: *Launch of the National Program for Aerospace Development and Regional Integration of Central America in New Technologies Generation (July 2010)*

# DAEDALUS Project

- ACAE is building an aerostatic globe that will allow to obtain climate predictions, it will measure the temperature and concentration of CO<sub>2</sub> in the atmosphere.
- The project is being sponsored by the Ministry of Foreign Affairs and financed by SICA the regional Government entity.
- The first launch was successfully made on December 18<sup>th</sup>

# Ecodiplomacy: First conclusions

- ◆ We are evolving from economic globalization to environmental interdependency.
- ◆ We are evolving from politicians' short-term cycle to environmental long-term impacts and remedies.
- ◆ We will need more -not less- negotiations and multilateral agreements...even in times of financial crisis and regional or local conflicts.
- ◆ Ecodiplomacy lives in a greenish fish bowl
