Key issues

- Changing nature of the international climate change framework
- Barriers and enablers for national action
- What makes for effective climate legislation
- Recent legislative developments
- q Challenges ahead

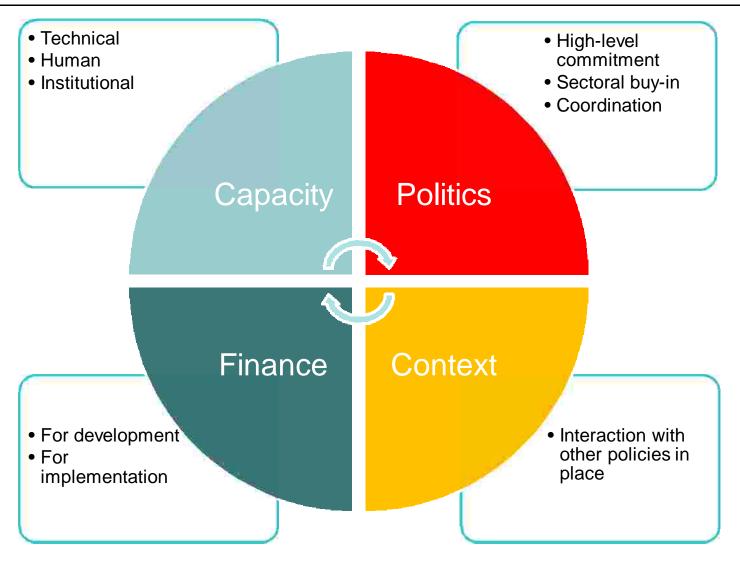

Changing nature of the international framework

- Shift away from top-down "burden-sharing" approach
- Toward bottom-up framework driven by "nationally determined" actions
 - Countries to prepare nationally determined contributions (INDCs) and to communicate in advance of COP 21 (in Q1/2015 if ready)
 - **Upward flexibility** with rolling 5-10 year targets with periodic revision and lower and upper "range" of commitments
- Robust and transparent measurement, reporting and verification (MRV) system is the glue of the framework
- q Effectiveness of national actions and legislation are at the centre of success

Barriers to national climate actions: Lessons from developing countries

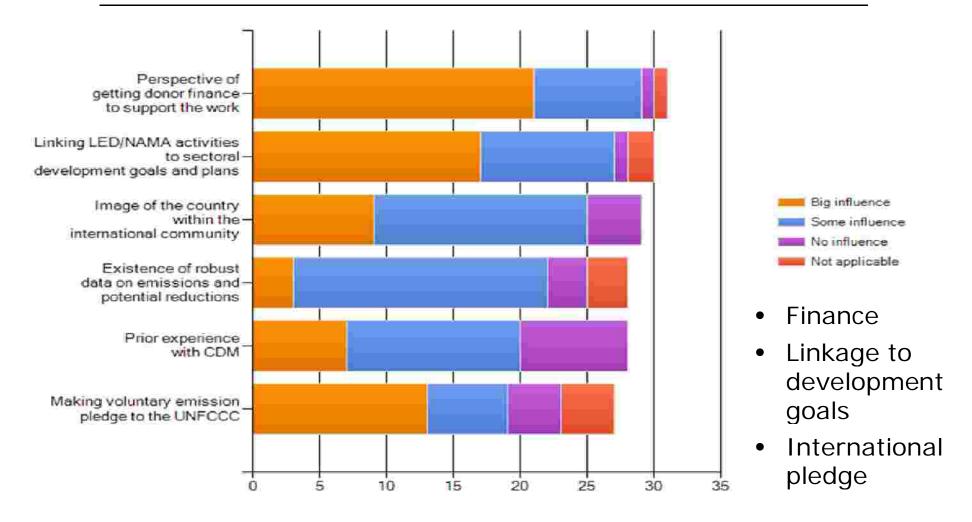

Source: Survey of policy makers in 25 developing countries; Averchenkova, UNDP LECB, 2014

Factors in getting national political commitment

Source: Survey of policy makers in 25 developing countries; Averchenkova, UNDP LECB, 2014 http://www.lowemissiondevelopment.org/docs/Barriers_to_NAMAs_r4.pdf

Getting national policy going: What has worked

- Raising awareness and capacity
- Compare Compare Linking climate change to national & sectoral development goals & plans
- Engaging sectoral ministries into decision-making
- Creating incentives for key agencies to engage
- Technical or thematic working groups; interagency decision committees
- Adoption of national strategies & laws

Elements of Effective legislation

- Information
 - To inform domestic policy; to comply with international MRV requirements
- Targets
- Policies on mitigation and adaptation
- q Institutional arrangements
 - Advisory board; delegation of responsibilities; Parliamentary oversight; provisions for enforcement and MRV
- Finance

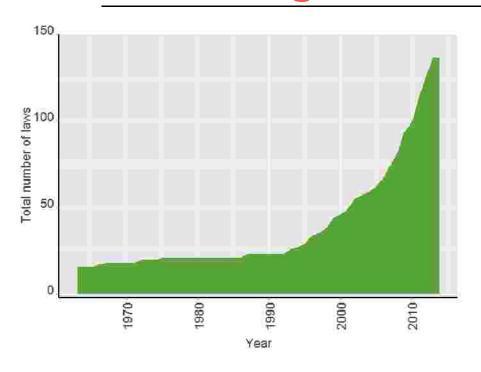

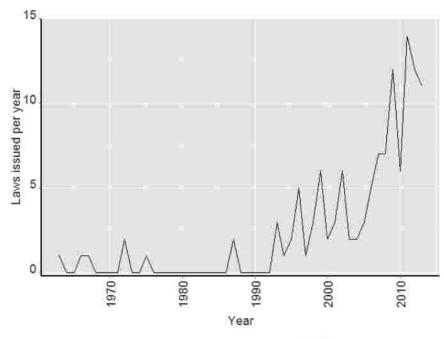

Developments in 2013

- q 4th GLOBE Climate Legislation Study, 2014; 66 countries
- q 487 climate-related laws in 66 study countries
- q 61 of the 66 countries passed laws to promote clean energy & 54 to increase energy efficiency
- q 52 countries have developed legislation or policies to improve resilience to the impacts of climate change
- Substantial progress in 2013 in 8 countries;
 - q Bolivia, El Salvador, Guatemala, Kenya, Micronesia, Mozambique, Nigeria and Switzerland

Forest legislation is growing

Developments in 2014

- Q 2015 Study expanded to cover 100 countries; launch in spring 2015
- q 34 new country chapters:

Algeria, Angola, Austria, Belarus, Belgium, Belize, Botswana, Bulgaria, Burkina Faso, Cameroon, Cuba, Egypt, Finland, Greece, Grenada, Hungary, Iran, Iraq, Ireland, Kuwait, Libya, Madagascar, Myanmar, Portugal, Romania, Singapore, Slovakia, Spain, Tajikistan, Trinidad and Tobago, Tuvalu, Uganda, Uzbekistan, Vanuatu.

- Collect information on the key elements of effective legislation & INDC process
- Progress so far identified in 19 countries out of 66 considered last year; 1 reversal (work in progress)

Challenges ahead

- Ensuring consistency between international pledge (INDC) and national policy & legislation
 - National consultations involving legislators ahead of Paris
- Oriving high ambition while balancing national interests, international objectives and equity considerations
 - Q Local benefits of climate action
- Making national legislation compatible with international MRV requirements and best practices
 - Awareness raising on MRV for national legislators
- Changing role of national legislators vis-à-vis UNFCCC
 - Key for ambition, enforcement & effectiveness of climate action
 - Legislator's dialogue: consistency & comparability among national systems

Thank you.
