

Budget Short Term Accommodation Options

Homestay:

This type of accommodation is popular with overseas students wishing to improve their English language skills and live as part of a family. The advantage of this kind of accommodation is that you do not have to commit yourself to a very long stay (often as little as two weeks), so if it isn't working you can end the arrangement fairly easily. Most of the accommodation portfolio would be situated in Zone 2/3/4 in London.
