

MAKING THE SUNBEAM FROM YOUR A3 ARTWORK.

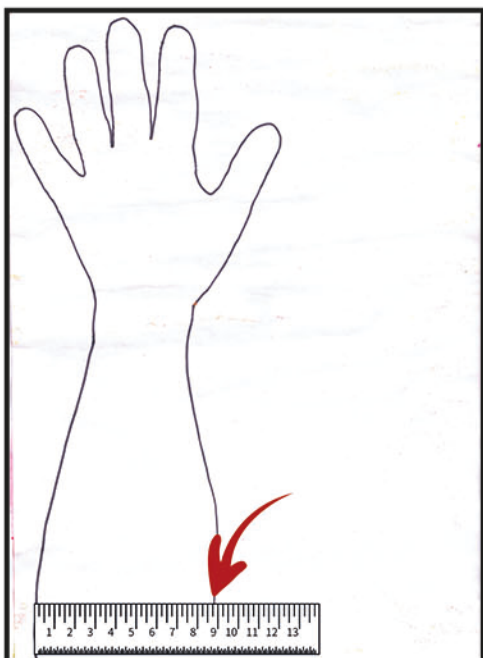

Turn over your art work so you can use the white side of paper. Lay down your arm and open hand. (Take off any watches or bracelets you have on your arm).

Make sure the fingers are at the top of the paper. You can use your right or left hand.

Using a pencil trace very carefully around your arm and hand. Go slowly so that you can trace the shape really well. You may need to work in pairs as this can be tricky!

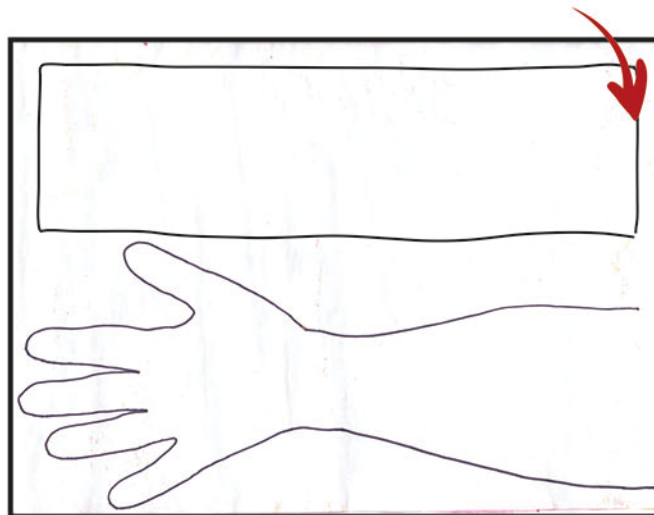

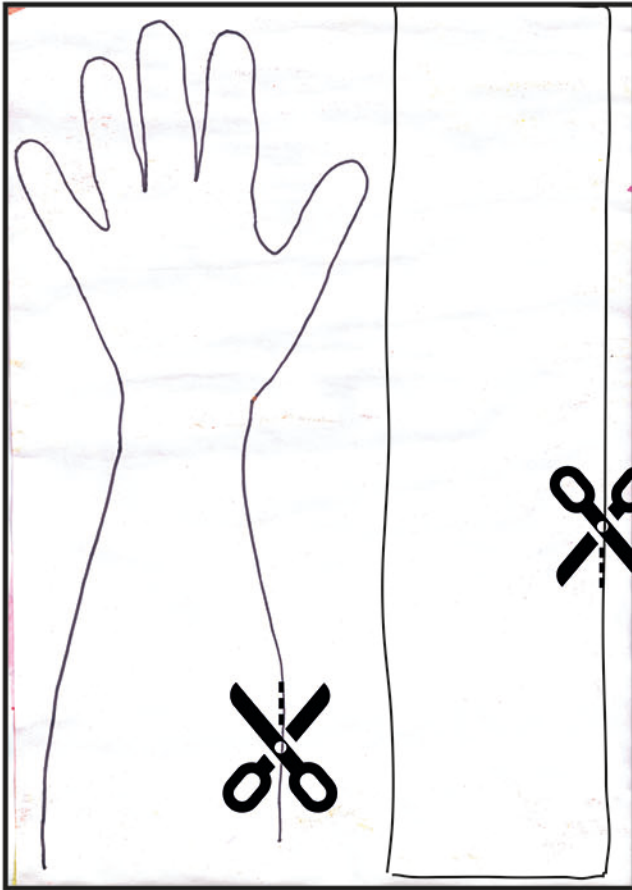

On the empty space on the paper, we need to draw a long rectangle that is the same width of the bottom of your arm.

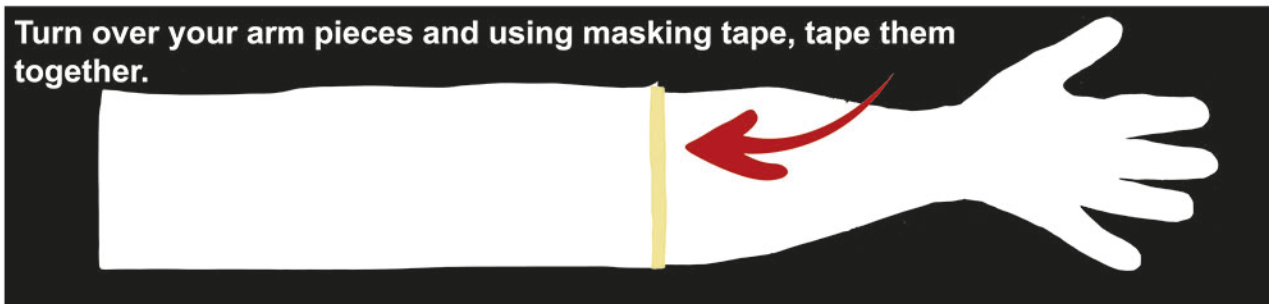

Measure across the width of the arm. Now draw a rectangle that has the same width as this measurement.

HAND DRAW - RATHER THAN RULER

Cut out very carefully your hand and the long rectangle. Ask for help if you need it.

Remember to write your name and class on the back of your sunbeams

You have finished your Sunbeam! Make one per each piece of artwork
