## Footnotes

A : MY452 is an advanced Applied Regression Analysis course offered by the Department of Methodology and must be taken by students who select MC4M7. Students wishing to select this option need to already have a grounding in quantitative methods and must seek approval from the Programme Director. Approval is also subject to timetabling constraints.

B : Passing this course is a requirement for passing the programme.

# means there may be prerequisites for this course. Please view the course guide for more information.

Students can take up to one full unit of courses outside the Department of Media and Communications Department (non MC-prefixed courses).

### Note for prospective students:

For changes to graduate course and programme information for the next academic session, please see the [graduate summary page for prospective students](#). Changes to course and programme information for future academic sessions can be found on the [graduate summary page for future students](#).

## Lecture and Seminar Timetable: 2021/22

Correct as of 06 Sep 2021 09:15

[Back to Timetables home page](#)

This page includes information for lectures and seminars. The timetable for undergraduate classes will be published in mid-September.

The approach for the 2021/22 academic year is to provide flexible teaching and learning which blends both in-person and online elements. Lectures will be largely delivered online. All lectures will be recorded and made available for students. Many lectures will be 'live online' in the scheduled lecture slot, for others lecture content will be pre-recorded and made available to watch. Details for each course will be outlined on the course Moodle pages. Classes and seminars will run in person, on campus. Lent and Summer Term teaching arrangements are still subject to change, these arrangements including room allocations will be finalised and published in November/December.

**Make Changes to Course Choice**

**Add courses**

The following courses are listed in your [programme regulations](#) . You should register for all the courses in which you will be assessed (i.e. all courses with credit unit value and are counted towards the overall award of the degree) in the current session, **including compulsory courses, optional courses and dissertation**. Please ensure that you register for no more than the total number of courses as required and approval from the Programme Director will be necessary if your course choices do not fall within the programme regulations. (Note: if you are going to submit a dissertation for a course normally assessed by invigilated examination, please make sure that you enter the appropriate course code.)

If you are registered on a 2-year programme, please note the courses listed below cover both years of the programme. Please ensure that you select the courses that you are taking in the current session only.

An unlisted course can be selected via the 'Fetch' facility. The following link will enable you to access the course guide if required: <http://www.lse.ac.uk/resources/calendar/>

If you think you need to re-enter for assessment in a failed or deferred course from a previous session please see the information [here](#).
