# PARENTING FOR A DIGITAL FUTURE

HOW HOPES AND FEARS ABOUT TECHNOLOGY SHAPE CHILDREN'S LIVES

Sonia Livingstone and Alicia Blum-Ross

30% OFF

In contrast to panicky headlines about clueless parents and kids glued to screens, *Parenting for a Digital Future* offers a balanced, in-depth exploration of the realities of parenting today. Drawing on interviews with and surveys of diverse parents—rich and poor, parenting toddlers to teenagers—the book offers a warm and deeply human depiction of how parents' hopes and fears about technology influence how they remember their own pasts, how they parent in the present, and crucially, how they shape their children's futures.

FEATURES

- Critiques popular screen time advice and offers an alternative vision of digital families

- Links parenting studies to social influence of class, which is often under-discussed in relationship to the impact of technology

- Based on robust new qualitative and quantitative research, rather than one method alone

Sonia Livingstone is a professor in the Department of Media and Communications at the London School of Economics and Political Science.

Alicia Blum-Ross is currently the Public Policy Lead for Kids & Families at Google.
