4/2015 – 7/2015

Colombian delegation – OECD

Policy analyst intern

Paris

- Redesigned and prepared a Newsletter stating and analysing the OECD's recommendation over Colombian policies. To do so, the delegation enlarged the readers data base and raised awareness of the entry process among national and international stakeholders
- Conducted a research project on the impact of agricultural OECD recommendations in Colombia. Particularly, the effect of reducing agricultural subsidies compared with other countries' experiences.

10/2013 – 8/2014

Association of Oil Companies in Colombia

Senior Economist

Bogota/Colombia

- Created new economic and policy reports about the dynamic of oil sector in Colombia. These reports were accepted by board members of the association to be implemented monthly. They increased the visibility of the Association among stakeholders
- Coordinated meetings among oil companies' representatives to define comments about law and bill drafts. Specially, I worked in the oil sector's answer for a bill of a new tariff scheme in pipelines and another of new terms of reference for the 2014 auction of oil fields
- Performed forecast model of "government take" and domestically produced oil for Colombia. This model was an input for the Ministry of finance in his financial plan 2014-15.

7/2011 – 9/2013

Fiduprevisora

Principal Economist

Bogota/Colombia

- Responsible of a team (four people) to make economic reports and presentation to clients, We created three new economic reports, augmenting the number of costumers engaged
- Forecasted of economic variables which led the company for first time to the first place in the national survey of macroeconomic forecast which is made by the Central Bank of Colombia
- Developed investment strategies base on models of asset allocation and economic projections. Due to it, the company diversified further its portfolio, incorporating international bonds.
