# VISIONS OF FEMINIST PEACE

14 September – 2 October 2020

PROGRAMME

# Introduction

To mark the 40th anniversary of the launch of CEDAW, the 20th anniversary of the Security Council's Women, Peace and Security (WPS) Agenda, and 25 years since the Declaration and Platform for Action at the conclusion of the Fourth World Conference on Women in Beijing, the AHRC-funded Feminist International Law of Peace and Security (FILPS) project is organising a series of virtual events in collaboration with the Women's International League for Peace and Freedom to build on visions of a feminist peace.

Women's tireless activism through political institutions and local communities, through protest, advocacy, litigation and scholarship, has been instrumental in securing the progressive development of policy and law, at national and international levels. Across the world, women's and feminist groups are using legal and policy tools creatively to advance equal rights. Yet transformative change remains slow. Women are still fighting for equality in all spheres of life. Peace remains an elusive goal. Women, and even more so minority women, continue to be excluded and marginalised from mainstream conflict prevention efforts to peacebuilding measures.

Visions of Feminist Peace brings together academics, advocates, practitioners, activists, artists, and students to showcase the plurality of peace visions, experiences, and discontents.

# A Feminist Vision of Peace

As part of the FILPS project, we have spent the past year discussing the methodology of alternative resolutions, visions, declarations, utopias and demands that centre peace rather than security in international law. Following a workshop in September 2019, we began to develop a set of feminist demands grounded in international law to mark the 75th anniversary of the United Nations and the 20th anniversary of the Women, Peace and Security agenda. The demands will be made available on our website and we encourage you to consider what demands you would make to the member states this year to mark these anniversaries.

66

The Security Council does not address how militarism, availability of arms, colonial depredation, discriminations, neo-liberal economic policies and environmental or climate harm all undermine peace. Nor does it recognise the diversity of women and their situations.
